

NEW PRODUCT!

Announcement Number: S05211901

Check out this easy drop-in fix to eliminate TCC slip codes due to leaks. Our new TCC regulator valve is designed to seal the leaks on both ends!

This TCC assembly includes;

- **New TCC regulator valve**
- **Scarf-cut sealing ring**
- 2 spring options for your application:
 - Orange:** for stock TCC pressure and feel
 - Green:** provides slightly elevated TCC pressure and slightly firmer TCC Apply. Great for work trucks and high performance applications.
- **O-ring** (for sizing only)
- **0.125" Drill bit** for optional ON/OFF lockup
- **0.063" Drill bit** for optional ON/OFF lockup
- **Rivet** for optional ON/OFF lockup

Optional ON/OFF lockup in 2 easy steps!

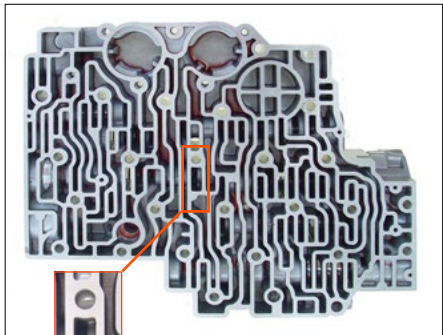

For high power hot rods or overloaded trucks

Convert lockup into an ON/OFF system for improved holding with a shorter apply time for severe duty applications. NOT FOR USE WITH NORMAL APPLICATIONS. It can make lockup firm.

Detailed instructions are included inside packaging. Be sure to carefully follow them.

Step 1 Enlarge hole in plate and rivet

Step 2 Drill floor of spring cavity

**ENGINEERED FOR PERFORMANCE.
DESIGNED FOR DURABILITY.**
