

4R100-LU

Converts soft PWM lock up to on off lock up. Must be used with TransGo SK or Reprogramming Kit. Not recommended with aftermarket triple disc Converter. Great for HD use.

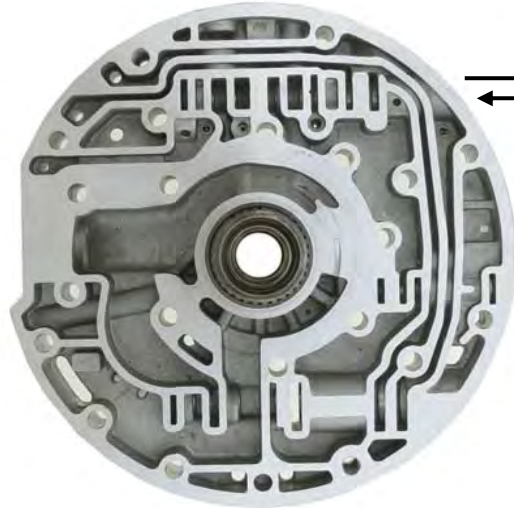

Step 1

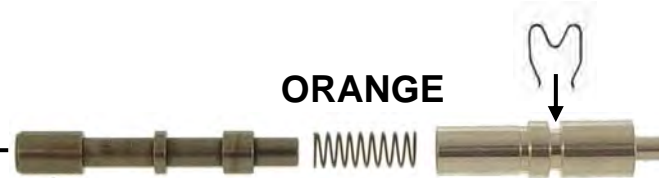

Measure factory Valve here: Kit will only work in Pump Covers with .530" Valve bore diameter. Some Pumps have .541 bore diameter. Check new Valve for proper fit.

Discard PWM parts, re use Retainer Clip.

ORANGE

Step 2

Install new Lock up Valve, Spring & Bushing.
