

# 6L80-CFR

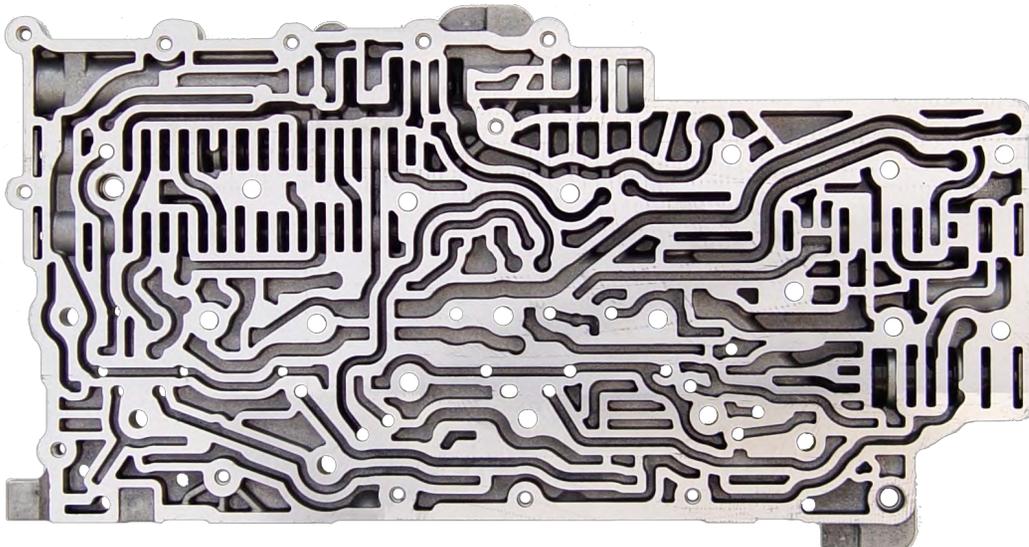

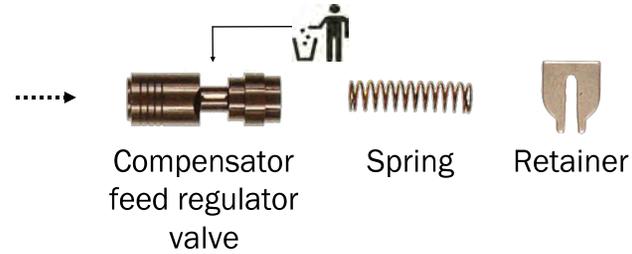

**Compensator Feed Regulator Valve**  
**Fits 2006-on 6L45, 6L50, 6L80, 6L90**

## **Corrects/Prevents/Reduces:**

Harsh shifts — Coast downshift clunks — Soft or flare upshifts — No or delayed engagement

**1.** Remove and discard the original compensator feed regulator valve, keeping the spring and retainer for later.

**2.** Clean the bore thoroughly. Then try the valve by itself in the bore first to ensure it is moving freely. Install **new compensator feed regulator valve**, original spring, and retainer.
