

Gain complete **control** and **visibility** of your production environment.

As your manufacturing process becomes more complex, it gets harder to manage and optimize your operations. A **My Equipment** subscription puts you back in control of your industrial automation assets, providing data-rich insights to help you improve asset utilization, lower risk, and minimize downtime across your enterprise.

How well do you know the assets in your facility?

\$188B

of automation systems' installed base, is nearing end of life

Source: Technology & Services Industry Association (TSIA)- The State of Industrial Equipment Report 2026

Know your risk of costly downtime.

43%

of unscheduled downtime is caused by aging equipment

Source: Technology & Services Industry Association (TSIA)- Predictive Maintenance Report 2023

Make the shift from passive to active management.

10X

ROI average savings from proactive maintenance strategies vs. reactive

Transform your asset management with a **My Equipment** subscription

My Equipment features intuitive dashboards and reporting tools that give you complete visibility of your assets, enabling you to:

REDUCE operational cost

- Lower inventory carrying costs
- Build spares strategies
- Reduce data collection costs

DECREASE enterprise risk

- Assess and mitigate obsolescence risk
- Gain asset visibility across multiple sites in your enterprise
- Develop risk profiles based on your most critical assets and machines

IMPROVE asset utilization

- Enhance device availability for critical inventory
- Enable compatibility planning
- Reduce downtime associated with extended device replacements

Make the shift from passive to active asset management

	Service and Entitlements	Required
Identify physical assets	Installed Base Evaluation™ (IBE® service) On-site data and physical device location is collected by a Rockwell Automation field service professional or Authorized Service Provider	✓
Reduce cost	My Equipment Self-Service Customer-managed device inventory	✓
	Manage Device Inventory Understand spares inventory related to installed base	✓
Decrease risk	Lifecycle Analysis Documents the lifecycle of assets and obsolescence risks	✓
	Enterprise Reporting View Installed Base Evaluation assets across multiple sites	✓
	NEW! Production Optimization Planning Tool Develop risk profiles based on your most critical assets and machines	✓
Improve asset utilization	Asset Optimization Plan Consultative service led by Rockwell Automation reliability professionals <ul style="list-style-type: none"> • Strategic, expert-led engagement provides a clear view of asset health, lifecycle risk, and operational priorities • Delivers a data-backed roadmap aligned to your installed base, spare-parts strategy, modernization objectives, and cybersecurity and digitalization goals • Prioritizes investments by asset criticality, enabling focus on what matters most for reliability, production continuity and risk reduction • Facilitates confident capital and operational expenditure planning through fact-based recommendations grounded in actual performance and lifecycle needs • Enables spend optimization by eliminating assumption-based decision-making and confirming investments directly support operational and business goals 	OPTIONAL

Start your journey to active asset management

With **My Equipment from Rockwell Automation**, you can harness data-driven insights to gain complete control and visibility of your operational environment. To find out more, contact your local Allen-Bradley® authorized distributor, or visit our [website](#).
