Industry Experience

David Koma, London
Internship in production and design teams
January 2024 - April, September 2024

Worked in the both design and production team assisting the head of design and atelier. Through this internship I obtained industrial level of knowledge of research and design development process, sample making, pattern cutting, spec sheet and hand sewing.

Fashion show experience through 2024 Autumn-Winter show by working as a staff managed organization in general. In September worked for 2025 Sprint-Summer as a helper.

Working in a team, I learnt how to cooperate with others and what makes a good team in response to that, I could get high reviews from all of the team members.

Maximilian Raynor, London
Internship in production and design teams
December 2023 - January 2024

Worked as a helper for his Master collection, "The nuclear family" . Through this experience I carried out delicate and time consuming hand craft very patiently as well as textile development, machine sewing and fitting.

Directly working with the creative director in a small team, I learnt how to develop the concept of the project and bring it to realization.
