

EDUCATION AND QUALIFICATIONS

2021-2024 **University of the Arts London, Central St. Martins**
BA Architecture

My third year projects included a music studio for Broadwater Farm Estate, Tottenham and a dissertation identifying the social divide which is instigated through architecture.

My design portfolio was inspired by my late uncle, Terry Moyes. 'Moyes Studios' aims to provide a platform for the youth of BWFE to break away from the negative stereotype and progress out of the estate. Music is already present among the youth of the estate and Moyes Studios will provide the space and tools for their hobby to become a potential career path. My uncles wall murals and passion for music inspired my project.

My dissertation is titled 'The Oxmoor: Social Politics in design and how architecture can divide communities'. It explores how the architecture of the Oxmoor, the London Overspill estate in Huntingdon, Cambridgeshire, reflects the social divide between itself and the local community. My parents both moved to the Oxmoor as part of the London Overspill scheme in the 1960s and my dissertation has an underlying structure following my mums life growing up and out of the estate.
