

ENRICO BELLENGHI

FILM-MAKER - ART DIRECTOR

PROFILE

My multifaceted education which includes different artistic fields, allows me to carry out activities and projects in the round.

In high school I obtained a diploma in graphic design with a specialisation in photography, then I started a university course in Fashion Styling and Communication in Milan, and after I obtained a Master in Fashion Film and digital production in London, to strengthen my creativity in the fashion sector, which best allows me to express myself artistically. The professional figure I would like to aspire to is to be an art director or film-maker for a production agency, magazine or as an internal designer for a brand.

I like to define myself as a chaotic creative, I always challenge myself to communicate a story or a language in all my work. I also have various work experiences in which I have held different roles both in Italy and abroad.

SKILLS

SOFT SKILLS

The skills that differentiate me from other young creatives are my passion for research and manual work. I have knowledge of photography, and filmmaking, I can make and develop films independently. Iconographic research is very important for the realisation of my
