

Beyond Logistics Limited Company Services Profile

Overview

Beyond Logistics Limited (BLL) is a Uganda-based logistics company established in 2013. With a mission to deliver efficient and sustainable supply chain solutions, BLL stands as a reliable partner for organizations in healthcare, consumer goods, and other industries. The company is guided by core values such as communication, collaboration, customer focus, integrity, and a growth mindset.

Service Offerings

1. Third-Party Logistics (3PL) Services

- **Warehousing:** Efficient inbound and outbound goods management, temperature-controlled storage, and customized solutions. Visual quality assurance and environmental monitoring ensure the integrity of all products.
- **Inventory Management:** Leveraging warehouse management systems for real-time tracking, accurate order processing, and inventory audits.
- **Distribution:** End-to-end transportation, reverse logistics, cross-docking, and last-mile delivery with insured goods during transit.
- **Repackaging & Relabelling:** Services tailored to client-specific requirements.

2. Procurement Services

- Comprehensive support in assessing procurement needs, sourcing locally and internationally, and managing customs and regulatory clearance.
- Forecasting and quantification of stock requirements to optimize operational efficiency.

3. Project Management

- End-to-end management of client projects, from initiation to closure, enabling partners to meet local tender requirements and contractual obligations.

4. Pharmaceutical Regulatory Services

- Acting as a local technical representative for manufacturers, facilitating product registration, regulatory inspections, and compliance with the National Drug Authority.

5. Supply Chain & Logistics Consultancy

- Conducting in-depth situational analyses to optimize partner operations, identifying opportunities for efficiency and cost reduction. Tailored solutions aim to align with business goals for measurable results.

Distinct Advantages

- a. **Zero Capital Investment:** Clients only pay for the space used, with no need for warehouse ownership.
- b. **Innovative Processes:** Modern equipment and automation enhance operational efficiency and accuracy.
- c. **Quality Assurance:** Comprehensive monitoring of temperature, humidity, and pest control measures.
- d. **Scalability:** Flexible solutions to meet seasonal demands and adapt to client growth.
- e. **Regulatory Compliance:** Adherence to National Drug Authority and ISO 9001:2015 standards.

Case Studies

- a. Warehousing and inventory management services for partners like Cipla QCIL, Living Goods and PSI.
- b. Procurement & Distribution of essential health commodities and Medical Equipment for USAID, their partners and other hospitals in Uganda.
- c. Collaboration with Haier Biomedical for vaccine storage solutions in Uganda.
- d. UNICEF & WHO solarization projects to improve health facility energy access.
