

Krista Kim

B. 1976

Based in Toronto, Canada

Introduction

Krista Kim is a digital fine artist and founder of the Techism movement. Her signature language of shifting gradients using digital software dates back to 2012, with her works on glass and plexiglass. Her work explores technology's effects on human perception, media, and social structures, and examines the use of it as instruments of well-being. Kim's pieces are meditative experiences of colour and light, hypnotising viewers into a sense of tranquility.
