

upbound Marketplace

The one-stop shop for all things Crossplane

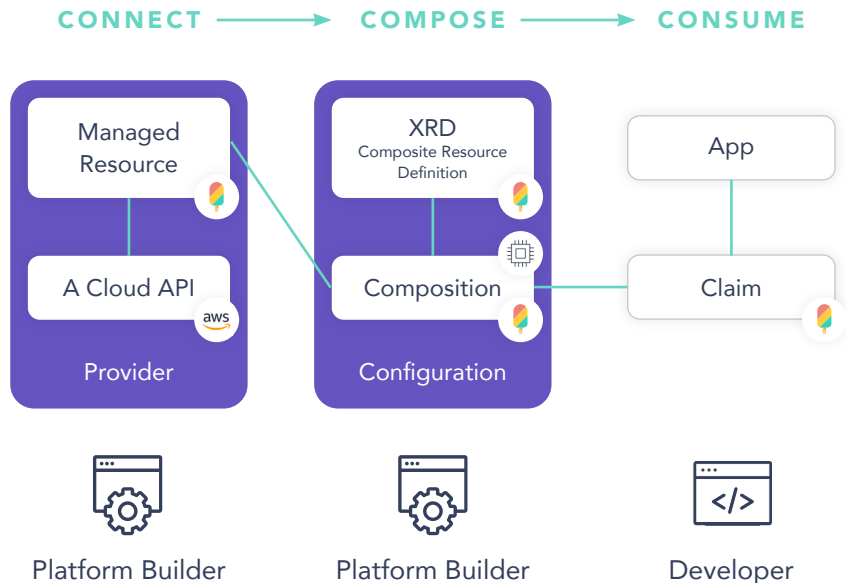

The Upbound Marketplace offers an easy-to-navigate interface that makes finding, understanding, and consuming Crossplane providers and configurations simple.

Sign up now to publish your own providers and configurations, auto generate documentation, and provide examples.

Just head to marketplace.upbound.io

Upbound Marketplace is a hub for platform engineers to discover, consume, and publish Crossplane components for their platforms. As a fully open source tool, anyone can use the **Upbound Marketplace**.

With **Upbound Marketplace**, you get:

- A catered place to host Crossplane packages – no more searching!
- Auto-generated API documentation for packages published to it
- Easy way to find & learn about different Crossplane extensions and how to use them at scale
- Upbound Official providers: a set of Crossplane providers and configurations that are maintained, tested and supported by Upbound.

Access Upbound Official Providers – only on the marketplace!
Just head to **marketplace.upbound.io**.
