

SERIES 7

TRACKLESS VEHICLES 74-INCH FRONT FLAIL MOWER

The Trackless front-mount Flail Mower was designed to cut heavier grass, weeds, scrub and light brush where a conventional rotary lawn mower could not cope. An enclosed mower housing and rubber safety skirts keep the cut grass, mulch, and other debris within the cutting chamber and enable safe mowing near roads, parks, and other busy or populated areas.

Large gauge wheels and a full-width gauge roller give the mower front-to-rear flexibility allowing it to follow ground contours producing an even cut without turf damage.

General Info

Width of cut: 74" (1879mm)

Cutting height: 1" to 4" (25mm to 102mm)

Gauge wheels: 2 -16" x 4" laminated

Gauge roller: 6" diameter steel, full width

Rotor tube: 4" diameter with 1-7/16" shaft

Blades: 33 - 2¾" wide (can be resharpened)
