

What is Hidden Figures?

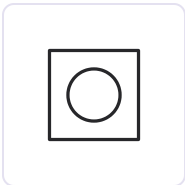

A simple figure is shown on the left, called the given figure. This exact figure is concealed inside one of the four complex answer figures on the right, each drawn as an outer shape with a smaller shape hidden at its centre. Study only the inner shape of every option and pick the one that matches the given figure.

Q1. Triangle Hidden Inside

GIVEN FIGURE

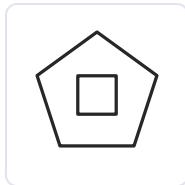

ANSWER FIGURES

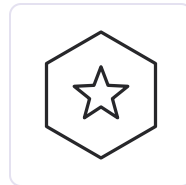

(A)

(B)

(C)

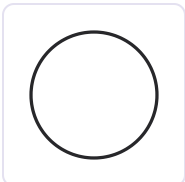

(D)

Answer: (B)

Look inside each answer figure for a plain triangle, the same shape shown on the left. Option B is a circle with a triangle hidden at its centre, matching the given figure exactly. The other options conceal a circle, a square, and a star instead.

Q2. Circle Hidden Inside

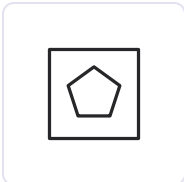

GIVEN FIGURE

ANSWER FIGURES

(A)

(B)

(C)

(D)

Answer: (A)

The given figure is a plain circle. Option A is a triangle with a circle concealed inside it, so it matches. Options B, C and D hide a pentagon, a triangle, and a square instead of a circle.

Q3. Star Hidden Inside

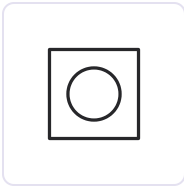

GIVEN FIGURE

ANSWER FIGURES

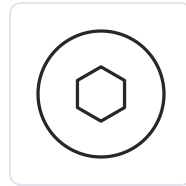

(A)

(B)

(C)

(D)

Answer: (A)

Scan the inner shape of every option for a five-pointed star like the one on the left. Only option A, a hexagon with a star hidden inside, contains it. The rest hide a circle, a pentagon, and a hexagon.

Q4. Plus Sign Hidden Inside

GIVEN FIGURE

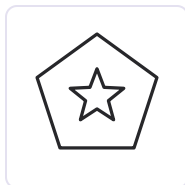

ANSWER FIGURES

(A)

(B)

(C)

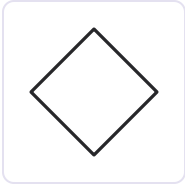

(D)

Answer: (B)

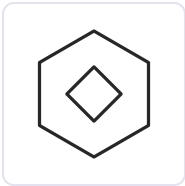

The given figure is a plus (cross) sign. Option B is a square with a plus sign hidden at its centre, matching it exactly. The other options conceal a triangle, a star, and a circle instead.

Q5. Diamond Hidden Inside

GIVEN FIGURE

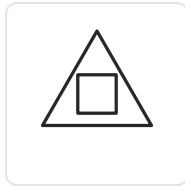

ANSWER FIGURES

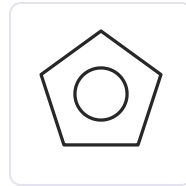

(A)

(B)

(C)

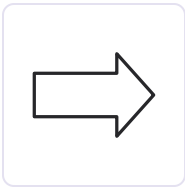

(D)

Answer: (A)

Look for a diamond (a square standing on its corner) inside each option. Option A, a hexagon with a diamond hidden inside, matches the given figure. The others hide a star, a square, and a circle instead.

Q6. Arrow Hidden Inside

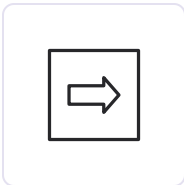

GIVEN FIGURE

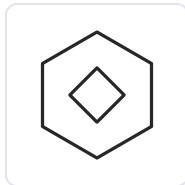

ANSWER FIGURES

(A)

(B)

(C)

(D)

Answer: (B)

The given figure is a rightward-pointing arrow. Option B is a square with the same arrow hidden inside it. Options A, C and D conceal a plus sign, a diamond, and a triangle instead.

Exam Tip

Fix the exact shape of the given figure in your mind first: how many sides or points it has, and its orientation. Then check only the INNER shape inside each option - the outer shape is just a distractor container and does not matter for finding the answer.
