STATISTICAL ANALYSIS OF DATA	
EXPECTED OUTCOMES	

Project title :

Scientific domain :

Researcher in charge of scientific project :

Date :

Signature of the scientific manager :

Synthetic and detailed forms are to be sent before February 15th :

dr.lemaslelastiolas@arthrosport-argonay.com

- Investigators commit to volunteering as medical volunteers or volunteers in the running of the UTMB.
- Investigators commit to present the results to the Medical Commission in Chamonix at the conclusion of the study.

EXHAUSTIVE PRESENTATION FORM FOR MEDICAL OR PARAMEDICAL STUDY

1. Summary description of the project

1.1 Goals

1.2 General hypotheses

1.3 Conflicts of interest

2. Material and methods

2.1 Participants

Recruitment mode :

Final place of recruitment:

Selection criteria :

Criteria for non-inclusion :

Eventual compensation of subjects :

2.2 Methods

Description of the protocol :

3. Expected results

4. Related documents

If necessary :

- PPC agreement and PPC submission form
- CNIL
- Information leaflet and informed consent of patients

Synthetic and detailed forms are to be sent before February 15th :

dr.lemaslelastiolas@arthrosport-argonay.com

- Investigators commit to volunteering as medical volunteers or volunteers in the running of the UTMB.
- Investigators commit to present the results to the Medical Commission in Chamonix at the conclusion of the study.
