

Reduce Your Travel Footprint

Population growth and industrialization have significantly increased global CO₂ emissions, especially through transportation. As an international event, most of our carbon footprint comes from participants' travel.

What can you do?

- **Carpool or share a ride** – join our [Facebook group](#) to connect with other runners.
- **Travel by bus or train** instead of flying whenever possible.
- If flying is your only option, **choose direct flights**, as they produce fewer emissions.

You can calculate the carbon footprint of your journey here:

<https://calculator.carbonfootprint.com/calculator.aspx?tab=3>

Offset Your Impact

We invite you to help compensate for your travel emissions by supporting forest revitalization in Slovenia's Karst region, which was heavily damaged by wildfires in summer 2022.

We use a simple conversion:

100 kg CO₂ = 1 € donation

(1 tree absorbs approx. 1.000 kg CO₂ in its lifetime; price per tree: 10 €)

All collected funds will be donated to *Fundacija Vrabček upanja* for the reforestation initiative “**Drevo za Cerje – A Tree for Cerje**”, where pine, maple and oak trees are being planted. This is more than carbon offsetting — it's about restoring a damaged Slovenian landscape.

You are not obligated to donate the exact calculated amount, any contribution is welcome.

Donation details:

JATrail d.o.o.

Mesarska cesta 4F, 1000 Ljubljana, Slovenija

Delavska hranilnica d.d.

SWIFT BIC: HDELSI22

IBAN: SI56 6100 0002 3236 406

Purpose: Donation for Kras

Let's make a positive impact together.
