

VALLOX EXXEO

Modern elegant roof fan range

The Vallox Exxeo range includes seven roof fans of different sizes and three models with different control methods.

VALLOX
HOME *of* FRESH AIR

VALLOX EXXEO ROOF FAN RANGE

The Vallox Exxeo range comprises the roof fans Vallox Exxeo 150, 300, 700, 1400, 2000, 2500 and 4100. The most suitable model is chosen according to the required air volume: with a static pressure loss of 150 Pa, the air flow of the smallest roof fan in the range, Vallox Exxeo 150, is 150 dm³/s, while the air volume of the largest fan is 4,100 dm³/s.

The Vallox Exxeo roof fan range features models with three different control methods: the basic model **Vallox Exxeo**; the **Vallox Exxeo DPC** (Differential Pressure Control) model equipped with an integrated differential pressure transmitter; and the **Vallox Exxeo DS** (Dual Speed) model designed for renovation projects. The basic model and DPC model can be connected to the building automation system via the Modbus bus and controlled with voltage messages. On/off status or alarm information can be obtained from both models. The DS model can utilise existing electrical connections and controls. Speed settings for both speeds can be made with a potentiometer.

Vallox Exxeo roof fans are tiltable, upward-blown and soundproofed on the inside of the enclosure. All models come with a safety switch connected, and controls are integrated into the frame. All models have air flow measuring tubes, and the fan is equipped with an EC motor. The metal parts meet the requirements of the EN ISO 12944-2 standard.

QUICK SELECTION TABLE

| Static pressure difference (Pa) | Volume flow rate, qv (m ³ /s) the penetration part in place in the roof fan Static pressure difference (Pa) | | | | | | | | | | | | | | |
|--|--|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|-------|-------|
| | 50 | 75 | 100 | 125 | 150 | 175 | 200 | 225 | 250 | 300 | 350 | 400 | 500 | 600 | 800 |
| Vallox Exxeo 150 | 0,204 | 0,192 | 0,180 | 0,170 | 0,160 | 0,147 | 0,137 | 0,126 | 0,113 | 0,085 | 0,058 | 0,035 | | | |

- Seven roof fans with different air volumes, three models with different control methods.
- The metal parts of the roof fan meet the requirements of the EN ISO 12944-2 standard (environmental impact category C4; C5 when painted).
- The enclosure is made of zinc-magnesium coated sheet metal. It can be painted to order with RAL tones.
- Upward-blown
- Plastic fan wheel with EC motor
- Withstands constant air flow temperature up to +60°C
- Controls integrated into the frame
- Enclosure soundproofed on the inside
- Enclosure protection class of electrical equipment IP54
- All models come with a connected safety switch
 - Basic and DPC models: Katko KSM 416 U (100 x 128 x 56)
 - DS model: Katko TKM 616 U (97 x 131 x 106)
- Diverse control options (see page 5).
- All models are equipped with air flow measuring tubes.
- All models are tiltable, and the structure is easy to open for maintenance. Wide range of accessories
- CE marking

WHY CHOOSE A VALLOX EXXEO ROOF FAN?

The zinc-magnesium coating protects the sheet metal against corrosion (environmental impact category C4).

The optional paint coating with the chosen RAL colour provides the roof fan surface with an additional layer of protection (environmental impact category C5).

The sealed tilting part included in the standard delivery efficiently seals the roof fan against the roof penetration.

The tilting part enables turning the roof fan to the side during maintenance.

The roof fan may be installed on top of a penetration made on site or by using the optional factory-made Vallox Exxeo roof penetration.

When replacing an old roof fan, the mounting frame (standard delivery) makes installing easier.

With lifting lugs, the roof fan can be lifted onto the roof easily and safely.

Rainwater is led to the side of the fan, and the perforated roof panel prevents leaves and other loose rubbish from entering the unit.

The control equipment is fully protected and integrated inside the roof fan behind a safety door.

The unit is delivered with the safety switch installed and cabled.

Excluding the two smallest sizes, the roof fans are ready to be directly connected to Modbus (not the DS model). The two smallest fans can also be controlled with a Modbus connection via a control panel card.

The sound dampening elements in the detachable side panels efficiently attenuate the sound penetrating the enclosure, ensuring that the roof fan is silent.

An outdoor temperature sensor and duct-mounted temperature sensor, humidity, carbon dioxide and VOC transmitters, a clock switch and a potentiometer are available as accessories.

Information to assist planning

The Vallox Exxeo roof fans can be found in the MagiCAD Cloud product database and they are available in the AutoCad and Revit software. In addition, the products can be found in the Cadmatic HVAC software.

Technical support for professionals

The Vallox technical support team will assist professionals in questions related to ventilation design, installation, setup and warranty servicing.

Vallox Exxeo roof fans may also be painted in the factory with a tone included in the RAL colour chart for a perfect match with the colour of the roof, for instance. Conceptual drawing.

| Vallox Exxeo 4100 DPC | 4118783 | 7815118 | | | |

The following must be observed when choosing the roof fan:

The static pressure indicated by the graph = pressure available for use in the ducts.
The pressure was calculated at the bottom end of the penetration part.
Air density = 1.20 kg/m³.

See the quick selection table on page 2 of this brochure.

TECHNICAL SPECIFICATIONS

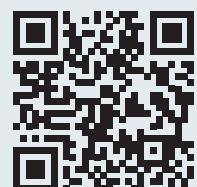

| Model | Weight kg | Electrical connection | Power taken from the network P1 kW | Power (A) | Fan enclosure protection class |

| Vallox Exxeo 700 DPC | 32 | 1~ 230 VAC, 50 Hz | 0.440 | 2.2 | IP54 |
| Vallox Exxeo 1400 | 68 | 1~ 230 VAC, 50 Hz | 0.800 | 4.0 | IP54 |
| Vallox Exxeo 1400 DS | 70 | 1~ 230 VAC, 50 Hz | 0.800 | 4.0 | IP54 |
| Vallox Exxeo 1400 DPC | 68 | 1~ 230 VAC, 50 Hz | 0.800 | 4.0 | IP54 |
| Vallox Exxeo 2000 | 73 | 3~ 400 VAC, 50 Hz | 1.100 | 1.8 | IP55 |
| Vallox Exxeo 2000 DS | 75 | 3~ 400 VAC, 50 Hz | 1.100 | 1.8 | IP55 |
| Vallox Exxeo 2000 DPC | 73 | 3~ 400 VAC, 50 Hz | 1.100 | 1.8 | IP55 |
| Vallox Exxeo 2500 | 99 | 3~ 400 VAC, 50 Hz | 1.100 | 1.85 | IP55 |
| Vallox Exxeo 2500 DS | 101 | 3~ 400 VAC, 50 Hz | 1.100 | 1.85 | IP55 |
| Vallox Exxeo 2500 DPC | 99 | 3~ 400 VAC, 50 Hz | 1.100 | 1.85 | IP55 |
| Vallox Exxeo 4100 | 107 | 3~ 400 VAC, 50 Hz | 3.500 | 5.6 | IP55 |
| Vallox Exxeo 4100 DS | 109 | 3~ 400 VAC, 50 Hz | 3.500 | 5.6 | IP55 |
| Vallox Exxeo 4100 DPC | 107 | 3~ 400 VAC, 50 Hz | 3.500 | 5.6 | IP55 |

Thanks to the sealed tilting part, the roof fan efficiently seals the fan against the roof penetration. The tiltable part makes it possible to turn the roof fan to the side during maintenance.

CONTROLLING

| Model | Control methods |
|-------------|--|
| Basic model | 2-speed or 0–10 V control and Modbus connection |
| DS model | Similar to an old AC dual speed roof fan |
| DPC model | 2-speed or 0–10 V control, pressure and air volume control and Modbus connection |

INSTALLATION

Vallox Exxeo roof fans may be installed on top of a penetration made on site or using the factory-made Vallox Exxeo roof penetration part.

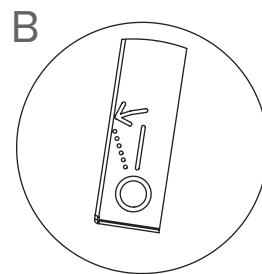

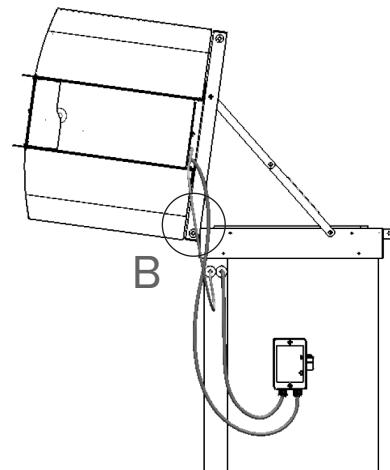

The tilting part attached to the fan is equipped with a seal that seals the fan against the roof penetration. The fan is fastened to the roof penetration with self-drilling screws. Below is an illustration of the installation of the fan.

Lift the fan from the enclosure lugs. Pay attention to the lifting angle of the sling. The lifting angle of the sling should be less than 50°.

Where necessary, the mounting frame delivered with the fan can be used for installing the fan on top of an existing flue or roof penetration part.

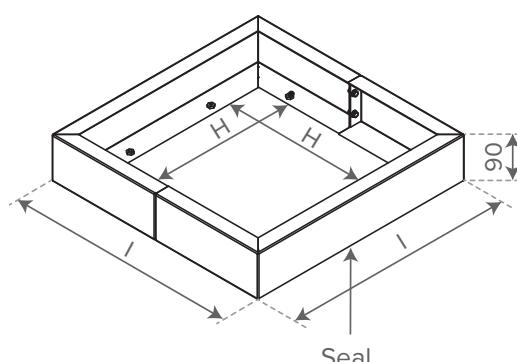

See the Vallox Exxeo manual for more detailed installation instructions.

The pivot point is marked on the bottom plate of the fan as shown in Figure B.

Vallox Exxeo mounting frame

| DIMENSIONS | | H | I |
|------------------------|--|-----|-----|

Vallox Exxeo 2000-4100 (DS model)

ACCESSORIES

Vallox Exxeo clock switch

- Digital week clock switch for DIN rail Operating voltage 230 V AC.
- Enclosure protection class IP20.
- Operating temperature -10°C...+45°C.
- Week clock delivery includes the clock and enclosure (IP55).

Product numbers and HVAC codes can be found on page 4 of this brochure.

Vallox Exxeo potentiometer

- The roof fan control panel card provides an operating voltage of +11 V for 0-10 V stepless control of the potentiometer.
- Dimensions (w x h x d): 82 x 82 x 65 mm.
- The potentiometer can be immersed in the outlet box IP44 or mounted on the wall surface IP54.

Vallox Exxeo humidity transmitter

- The humidity transmitter measures the relative humidity and temperature of the air in the ventilation duct.
- The humidity and temperature data are converted into linear analog messages. Operating voltage 24 V.
- Enclosure protection class (metering probe or cable feedthrough down): Transmitter part IP54, sensor IP20.
- Dimensions (w x h x d): 96 x 119 x 233 mm.

Vallox Exxeo VOC transmitter

- VOC transmitters are designed to measure and adjust VOC content (VOC = Volatile Organic Compound) and temperature in ventilation ducts. Need-based ventilation can be efficiently controlled with VOC data.
- Operating voltage 24 V.
- Enclosure protection class (metering probe or cable feedthrough down): Transmitter part IP54, sensor IP20.
- Dimensions (w x h x d): 105 x 104 x 155 mm.

Vallox Exxeo CO2 transmitter

- CO2 transmitters are designed to measure and adjust the carbon dioxide content and temperature in ventilation ducts.
- Operating voltage 24 V.
- Enclosure protection class (metering probe or cable feedthrough down): Transmitter part IP54, sensor IP20.
- Dimensions (w x h x d): 105 x 104 x 155 mm.

Vallox Exxeo temperature sensor for wall

- Temperature sensor for mounting on external walls of buildings for outdoor temperature compensation.
- Measuring element NTC 10.
- Protection class IP54.
- Bushing seal M16 x 1.5.
- Measuring range -50°C...+50°C.
- Time constant 10 min
- Materials: Box lid PC, base PBT, bushing seal PA

Vallox Exxeo duct-mounted temperature sensor

- Duct sensors are used for density adjustments.
- Measuring element NTC 10.
- Protection class IP54.
- Bushing seal M16 x 1.5.
- Measuring range -50°C...+50°C
- Time constant 25 s
- Materials:
 - Box lid PC, base PBT, bushing seal PA
 - Conduit Ms, Ø 8 mm, length 250 mm
 - Flange PA

Vallox Exxeo roof penetration part

- The roof penetration part is used for the roof fan installation (see page 16).

Vallox Exxeo underpressure damper

- The underpressure damper closes the duct and prevents outdoor air from flowing back when the roof fan is switched off (see page 16).

Vallox Exxeo RAL colour

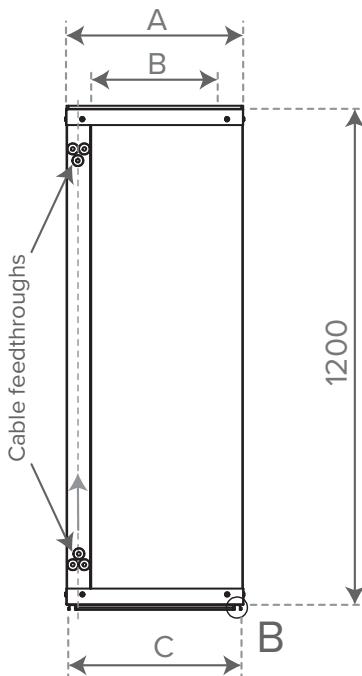

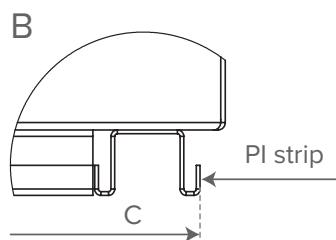

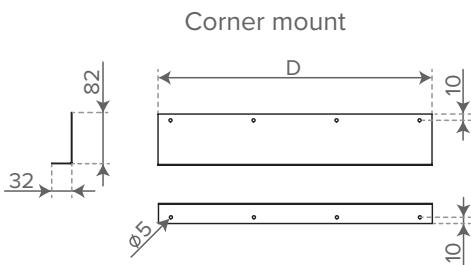

- Upon request, Vallox Exxeo roof fans are delivered painted with the chosen RAL tone.

Vallox Exxeo roof penetration part (optional)

The roof penetration part is made of magnesium-zinc coated sheet metal. Inside, there is a galvanized perforated plate and a 60 mm mineral wool plate covered with mesh-reinforced black aluminum laminate. The fire rating of the mineral wool plate is (A2 - s1, d0) and density 180 kg/m³. It is intended for the fire insulation of rectangular air ducts up to fire rating EI60. The roof penetration

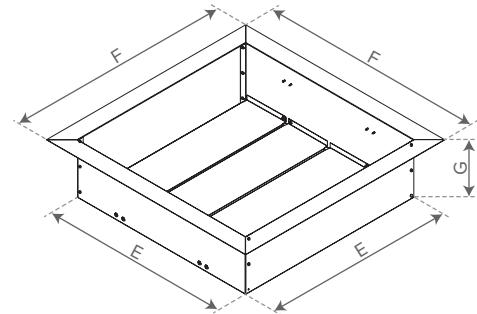

part is delivered with corner mounts which can be used for fastening the roof penetration part to the roof structures. The roof penetration part includes a cable trough through which the feed and control cables can be led to the fan.
