

VALLOX DUCT FAN

DIMENSIONS

EXTERNAL ELECTRICAL CONNECTION

DESCRIPTION OF OPERATION

Vallox Duct Fan

- Vallox Duct Fan is mounted on top of the cooker hood or as an extract air fan in the ceiling structures of the bathroom, for example.
- The compatible cooker hoods are Vallox Delico PTD EC, Vallox Capto PTC EC, Vallox X-Line PTXP MC and Vallox X-Line PTXPA MC. The duct fan can also be paired with other cooker hoods that are suitable for controlling EC fans.
- The duct fan may also be installed without a cooker hood. This means that the fan is used for general ventilation of a kitchen and it is controlled with a separate SC control panel. In this case, cooking smells can be removed with an activated carbon fan.
