TOGETHER

The GORE® EXCLUDER® Device family offers the broadest EVAR treatment
The standard of care for AAA treatment
• Proven to be safe, effective, and durable
• 96.0% Freedom from device related reintervention*
• 0.0% Migration**
• 0.5% Limb occlusion*

Expanding EVAR for challenging proximal necks
• Aortic neck angle up to 90°
• Aortic neck length down to 10 mm
• Aortic neck diameter down to 16 mm

GORE® EXCLUDER® AAA Endoprosthesis featuring C3® Delivery System

GORE® EXCLUDER® Conformable AAA Endoprosthesis with ACTIVE CONTROL System

More than 20 YEARS of EVAR experience
Proven Performance. Proven Outcomes.

The most-studied* EVAR stent graft brings durable outcomes, providing optimal infrarenal seal and reliable results.

GORE® EXCLUDER® AAA Endoprosthesis featuring C3® Delivery System

GORE® C3® Delivery System

- Repositionable to obtain optimal seal
- Unique ability to reconstrain the proximal end and reposition for ideal placement
- More opportunities to maximize infrarenal seal

Addresses the majority of patient’s abdominal aortic aneurysm needs

* Based on clinical trials, registries and site-reported use
Controlled Conformability for Complex Anatomy

 Physicians now have an EVAR solution designed to treat patients previously excluded due to challenging proximal aortic necks.

GORE® EXCLUDER® Conformable AAA Endoprosthesis with ACTIVE CONTROL System

GORE® ACTIVE CONTROL System

Conformable stent graft
- Helps achieve optimal aortic wall apposition
- Adapts closely to the anatomy to maximize seal

Enhanced device positioning
- Secondary sleeve over trunk body allows repositioning for optimal placement

Optional angulation control
- Aids in orthogonal placement to optimize seal within flow lumen
- Controlled delivery allows for refinement of angulation at two stages

**Iliac Extender Endoprosthesis**

- All 16, 18, 20, 23, 27 mm diameter Contralateral Leg Endoprostheses can be used as Iliac Extenders.

**PLEASE NOTE:**
- All 16, 18, 20, 23, 27 mm diameter Contralateral Leg Endoprostheses can be used as Iliac Extenders.

*All large diameter Contralateral Leg Endoprostheses (16, 18, 20, 23, 27 mm) cannot be used as Iliac Extenders. The 27 mm x 10 cm Contralateral Leg Endoprostheses does not have a radiopaque marker 6 cm above the distal end. Traditional sizes of Iliac Extender (10, 12, 14.5 mm) are not compatible with large diameter (16, 18, 20, 23, 27 mm) Contralateral Leg Endoprostheses.*
