

Co-funded by
the European Union

PRESS RELEASE | March 2024

Viazi building a disruptive responsibility platform with the support of the EU

Viazi, a Finland-based start-up is transforming the way individuals and organizations create environmental and social impact, by using blockchain technology, IoT and satellite imaging.

Viazi creates environmental and social impact by providing cutting-edge potato farming resources to African smallholder communities, boosting their productivity by up to 3X and reducing their environmental footprint by up to 60%.

The European Union is co-funding the design and development of the first version of the solution.

For more information about Viazi, or any media inquiries, contact Anitti Hintikka at antti.hintikka@viazi.io or visit the Viazi website at www.viazi.io.
