FRANCE

Receiving treatment in France if you are from overseas

1

FRANCE IS ONE OF THE BEST MEDICAL DESTINATION

The French health system

France is recognised as having one of the best health systems in the world. Getting treatment in France means you benefit from a team of medical professionals and cutting-edge equipment.

Our regions

The different regions of France offer exceptional cultural diversity. We run private hospitals throughout France - your medical procedure could also be an opportunity to discover our country.

L'art de vivre

One of France's strengths is its celebrated gastronomy. You will get the chance to savour the very best dishes, prepared by top chefs.

2

MEDICAL QUALITY, REASONABLE PRICES AND EASY ACCESS

France has many convincing assets to play a major role in the international market. We offer **quality care, state-of-the-art techniques** and **recognized professionals**.

The World Health Organization ranked France as **the best system in the world**, reinforcing its reputation over the long term.

Access to care is relatively short: less than four months for 93% of scheduled surgical operations, ranking France 3rd out of the eleven countries in the Commonwealth Fund survey.

In addition, the **prices charged** in France are (very) **competitive** compared with countries offering care of similar quality, such as the United States.

Lunt N., Smith R. et al. (2011), Medical Tourism: Treatments, Markets and Health Systems Implications: A Scoping Review, OCDE.

Viberg N., Forsberg B., Borowitz M. et Molin R. (2013), « International comparison of waiting times in health care – Limitations and prospects », Health Policy, vol. 113, p. 53-61.
