Simple to use. Easy to share.
Quality within reach.

Superior image quality at an affordable price

The CS 1200 delivers superior image resolution (1024 x 768), providing a clear, detailed view of patients' teeth, anatomical structures, and soft tissues. And, as an affordable entry point into digital imaging, the CS 1200 puts high-quality intraoral images within the reach of any practice.

High quality images reveal even the smallest details.

Easy to share

Capture your patients' images and review them directly from your camera—no extra equipment required. The CS 1200 stores up to 300 images within the camera, eliminating the need for memory cards or a computer in each operator. Designed with convenience and flexibility in mind, the CS 1200 supports USB, S-Video, and AV for both PC and analog display. Plus, because the CS 1200 does not require docking stations, switching the camera between operatories is faster and easier than ever.

The CS 1200 stores up to 300 images in the camera. Review your images with a touch of a button.

Designed for comfort

Lightweight and compact for easy handling, the CS 1200 fits easily in hands of all sizes and minimizes operator fatigue. Meanwhile, the camera's rounded head and tapered shape ensure patient comfort while a one-click image capture button makes it easy to acquire high-quality still shots and videos.

Capture a full range of intraoral views

Simple to use

The CS 1200 features a 6-LED illumination system which automatically adjusts to ensure perfectly and uniformly lit images in any practice lighting condition. The camera's wide focus range captures a variety of views including macro, smile and full arches.

6-LED illumination system auto-adjusts to any practice lighting condition

Enhanced patient communication

Thanks to the camera's crisp, high-quality images, the CS 1200 facilitates communication with your patients—making it the perfect tool for patient education. Better understanding of treatment options can often lead to more informed decisions, which means the camera can also help improve your revenue opportunities and return on investment.
