

Context

UVG is focus on science and technology, our school of engineering has a leading position on innovation, academic standards, research an extension within the country and the region.

Biomedical Engineering represents an enormous potential not only for UVG but also for the country. Need human resources capable of developing, manage, repair and maintenance biomedical equipment and applications.

Goal

Develop a Roadmap for internationalization of the Biomedical Engineering Program:

Adaptable + **Achievable** + **Flexible**

Milestones:

Sustainability

Commitment and involvement

Challenges:

- Just keep a positive attitude
- Time
- Communication Skills
- Fast changes
- Accreditation process
- New program
