

## Job Description

<b>Job Title</b>	Bank Radiographer- Treatment Suite
<b>Hourly rate</b>	Competitive based on experience
<b>Department</b>	Minimally Invasive Treatment Suite (Welbeck Orthopaedics & Neurology)
<b>Location</b>	Welbeck, 1 Welbeck Street, London, W1G 0AR
<b>Reporting to</b>	Lead Radiographer

### About Welbeck

Welbeck was founded by doctors and healthcare leaders who believe that there is a better way to deliver care. We are driving excellence and improving patient outcomes by breaking down the barriers that exist in today's healthcare system.

Our London flagship, Welbeck, is a specialist facility with eight floors of minimally invasive day surgery and outpatient diagnostics, procedures and consulting. Our specialty Centres include Imaging and Diagnostics, Pharmacy, Orthopaedics and Neurology, Endoscopy, Heart and Lung Health, ENT & Skin Health, Women's and Men's Health, Digestive Health and Health Assessment and Longevity.

Welbeck Health Partners are developing several other Centres across the UK and internationally.

### The Opportunity

We are seeking an experienced and motivated Bank Radiographer to support the Minimally Invasive Treatment Suite at Welbeck Orthopaedics & Neurology on a flexible, as-required basis.

The successful candidate will provide high-quality radiographic services to support a range of minimally invasive and image-guided procedures, ensuring safe and effective patient care. Working as part of a multidisciplinary team, the post holder will contribute to maintaining high clinical standards, radiation safety compliance, and excellent patient experience.

This role offers the opportunity to work in a modern specialist facility alongside leading consultants and healthcare professionals, delivering outstanding care in an innovative clinical environment.

## Key Responsibilities

- Provide imaging support for minimally invasive and image-guided procedures using fluoroscopy and mobile imaging equipment.
- Ensure all examinations are performed in accordance with IR(ME)R regulations, local rules, and departmental protocols.
- Deliver safe, patient-centred care while maintaining dignity, privacy, and confidentiality.
- Perform patient identification and safety checks prior to procedures.
- Maintain accurate and timely clinical documentation.
- Support radiation protection practices and ensure compliance with relevant legislation and governance requirements.
- Undertake quality assurance checks and report equipment faults or concerns promptly.
- Assist with stock management and ensure imaging consumables are available for clinical sessions.
- Work collaboratively with consultants, nursing staff, anaesthetists, and other members of the multidisciplinary team.
- Participate in departmental audits, quality improvement initiatives, and mandatory training as required.
- Maintain professional registration and practice in accordance with the standards of the Health and Care Professions Council (HCPC) and the Society and College of Radiographers

## Candidate Profile

### *Essential*

- Current HCPC registration as a Diagnostic Radiographer.
- Experience working within fluoroscopy and/or theatre environments.
- Sound knowledge of radiation protection principles and IR(ME)R regulations.
- Excellent communication and interpersonal skills.
- Ability to work independently and as part of a multidisciplinary team.
- Flexible approach to working patterns and service requirements.
- Commitment to delivering exceptional patient care.

### *Desirable*

- Experience supporting spinal, orthopaedic, pain management, or interventional procedures.
- Previous experience within the independent healthcare sector.
- Immediate Life Support (ILS) certification.
- Experience using electronic patient record and radiology information systems.
