WERNER ELECTRIC SUPPLY

NETWORK SOLUTIONS

EMPOWERING SMALL BUSINESSES
with Remote Access Tools!

In today's changing landscape, remote access tools are critical in facilitating ongoing communication within your business.

Werner Network Solutions has the expertise to assess your technical infrastructure and establish a remote access connection. Our experts will suggest the best remote devices and services to keep you communicating and moving forward to address and maximize your business infrastructure needs.

Ease of Use, Quick Set Up!

Your small business will become empowered with an easy-to-use toolset and an intuitive simplified console. Our team will help you set up and leverage a remote connection within your network or server equipment, creating a quick, effective connection with your offsite employees.

Werner Industrial Services can provide:

- Network performance monitoring
- Remote access
- Virtual machine monitoring
- Antivirus management
- Patch management
- Backup and recovery
- Threat intelligence
- Log-event archiving
