Introduction

Eaton Solutions for UL 508 and NFPA 79

V5-T8-3

UL/CSA Standards for Disconnect Switches

UL® 98—Enclosed and Deadfront Switches (CSA® C22.2 No. 4)

These requirements cover enclosed or deadfront switches, with or without provision for fuses, at 600 V or less. These products are used as disconnecting means without restrictions; they are heavy-duty products requiring 2.00 inches (50.0 mm) minimum of creepage distance between phases, which gives maximum safety for users and installation. The short-circuit withstand of those products goes up to 200 kA.

UL 489—Molded Case Switches (CSA C22.22 No. 5)

These requirements cover molded case circuit breakers, molded case switches and fused molded case switches, rated at 600 V or less and 6000 A or less.

Typical Control Panel

UL Standards for Electrical Machinery

UL 508—Industrial Control Equipment (CSA C22.2 No. 14)

These requirements cover manual, magnetic and solid-state starters and controllers, overload relays, pushbuttons, selector switches and control lights.

These products are smaller, requiring only a creepage distance between phases of 0.50 inch (12.7 mm). Their use as a disconnecting means is limited to local disconnection of motors. These products can be used as a disconnect means only when they have been additionally tested "suitable as motor disconnect." This additional testing ensures that the switch has a proper closing capacity on a short circuit. UL 508 devices cannot be used as main disconnect of an electrical panel, for example, at the entrance of control panels.

A manual motor controller marked "suitable as motor disconnect" shall be installed only on the load side of the branch circuit protective device [UL 508A 30.33 and NEC® 430.109 (6)].

NFPA 79 Electrical Standard for Industrial Machinery

The following types of machines are identified as industrial machinery:

- Metalworking machine tools, including machines that cut or form metal
- Plastics machinery
- Wood machinery, including woodworking, laminating and sawmill machines
- Assembly machines
- Material handling machines, including industrial robots and transfer machines
- Inspection and testing machines, including coordinate measuring and in-process gauging machines

Eaton Solutions for UL 508A and NFPA 79

The changes in UL 508A and NFPA® 79 impact the design and construction of your equipment. Important modifications concern major safety issues, the disconnect means and the interlocking of the enclosure door.

The disconnect shall be operable independent of the door position.

The disconnect must be operable, by qualified persons, independent of the door position without the use of accessory tools or devices.

Note: NFPA 79; Paragraph 5.3.3.1 (5) T.

An operating mechanism for the disconnecting means shall be operable independent of the door position without the use of accessory tools or devices.

Note: UL 508A; Paragraph 66.6.3 c.

The disconnect means is not closable with the enclosure door open, unless an interlock is operated by deliberate action.

The interlocking means shall fulfill the following requirement: Prevent closing of the disconnect means while the enclosure door is open, unless an interlock is operated by deliberate action.

Note: NFPA 79; Paragraph 6.2.3.1.2.

The disconnecting means is not closable with the enclosure door open, unless an interlock is operated by deliberate action.

Note: UL 508A; Paragraph 66.1.5.

Operable independent of the position of the door

Door closed: Operation with the external handle through the door.

Door open: A robust optional kit with a handle directly fitted on the shaft of the switch allows the operation when the door is open.

Operated by a deliberate action

① Push

Door open: It is necessary to push the handle from OFF to ON. This deliberate action permits the operator to turn and switch ON. This action is necessary as in most cases there is no padlock on the switch when somebody opens the door of an enclosure.

② Turn

ON to OFF action permits the operator to turn and switch ON. That is a major safety issue; switching ON directly without any other action is extremely dangerous. The use of a padlock does not comply with the request of the standard; when the panel door is opened, there is generally no padlock, and anybody can turn the switch ON.

8.1

Rotary Disconnects

Introduction

The disconnect means shall be able to be locked in the OPEN position independent of the door position.

The circuit disconnecting device shall be provided with a permanent means, permitting it to be locked in the OFF position only independent of the door position. When locked, remote as well as local closing shall be prevented.

Note: NFPA 79; Paragraph 5.3.3.1 (3).

An operating mechanism for the disconnecting means shall be able to be locked in the OFF position independent of the door position. When locked, closing of the disconnect is not possible.

Note: UL 508A; Paragraph 66.6.3 d.

Locked in the open position independent of the door position

Door close: The external through-the-door handle is padlocked when locked closing of the disconnect is not possible.

Door open: A strong metallic padlock kit allows up to three padlocks. The padlocking means is easily accessible, when locked closing of the disconnect is not possible.

8

The interlocking of the enclosure door shall be provided with means to defeat the interlock without removing the power.

The interlocking means required by 66.1.5 shall be provided with all of the following:

- Means to defeat the interlock without removing power, and requires the use of a tool to operate
- Reactivated automatically when all the doors are closed

Note: Added 66.1.5.1 effective March 1, 2007. UL 508A; Paragraph 66.1.5.1.

NFPA 79; Paragraph 6.2.3.1.2 states that the [enclosure] interlocking means shall meet the following requirements:

- Use a device or tool to allow qualified persons to defeat the interlock
- Be reactivated automatically when the door is closed

Defeat the interlock without removing the power

A tool allows defeat of the interlock without removing power. The interlocking is reactivated automatically when the door is closed.

R5 Series Non-Fusible 16–100 A

Contents

Description	Page
R5 Series Non-Fusible 16–100 A	
Product Selection	V5-T8-6
Accessories	V5-T8-6
Technical Data and Specifications	V5-T8-10
Dimensions	V5-T8-11

Product Description

R5 Series (UL 508 listed) products are manually operated modular switches. Load break switching and isolation provide safety solutions for any low-voltage circuit, particularly for machine and control circuits. The R5 Series products are manual motor controllers suitable as motor disconnect.

Features, Benefits and Functions

- Up to 65 kAIC short-circuit rating
- Direct or external operation
- Compact footprint
- DIN rail or base mount
- Wide range of accessories
- Up to eight-pole or four-pole MTS
- Open and enclosed devices
- Modular design
- Integrated terminals for additional safety
- Padlockable design (direct, toggle and external handles)
- Product can be reverse fed

Product Identification

- ① External front handle
- ② Shaft extension for external handle
- ③ Direct handle
- ④ Switched fourth-pole module
- ⑤ Terminal shroud
- ⑥ Auxiliary contacts

Note: For further details, please see the installation instructions supplied with each device.

Guide Cone

Description	Ampere Rating	Use with Handle Type	Catalog Number
The guide cone facilitates an easier connection between the shaft and a Size 00 or Size 0 external selector handle. It allows the shaft up to 10 mm of vertical play when making the connection	16–100	SH00 and SH0	SFGAB

Notes

- ① Allows door to be opened when switch is in the ON position.
- ② Contains all metal internal parts.
- ③ Kit includes spacers and direct handle. For through-the-door applications, use any size 00 selector handle from the table above. Handle requires use of SF__SH5X5 type shaft.
- ④ Kit includes spacers and direct handle.

8.2

Rotary Disconnects

R5 Series (UL 508) Non-Fusible 16–100 A

Additional Pole Configurations

Switched Fourth-Pole Module

Switched Fourth-Pole Modules

Description	Ampere Rating	Number of Poles	Type	Catalog Number
Add one or two poles and transform:	16	1	Switched	S4PR516
• Three-pole R5 Series load break switch into a four-pole	25	1	Switched	S4PR525
• Six-pole R5 Series switch into an eight-pole	30	1	Switched	S4PR530
• Three-pole changeover switch into a four-pole	40	1	Switched	S4PR540

Unswitched Neutral Module

Unswitched Neutral Modules

Description	Ampere Rating	Number of Poles	Type	Catalog Number
Transforms a three-pole switch into a three-pole + solid neutral	16–40	1	Unswitched	UNMR5A
	60–100	1	Unswitched	UNMR5B

Protective Earth Module

Protective Earth Modules

Description	Ampere Rating	Number of Poles	Catalog Number
Adds 1 protective earth module pole to the disconnect	16–40	1	PEMR5A
	60–100	1	PEMR5B

Auxiliary Contact Configurations

Auxiliary Contact Modules

Description	Ampere Rating	Type	Catalog Number
Early-break/same-make and signalization of positions 0 and I by NO + NC or 2NO auxiliary contacts.	10 A (240 V)	1NO + NC	AC1N0NC
They can be mounted on the left or on the right side of the device.	10 A (240 V)	2NO	AC2NO
Two modules maximum.			
For use with A, B and C frames.			

Terminal Shrouds

Description	Ampere Rating	Number of Poles	Position	Catalog Number
Line and load protection against direct contact with the terminals or connection parts: single- or three-pole.	16–40	1	Line and load	TS1R5A
Advantage: Perforations allowing thermographic inspection.	16–40	3	Line and load	TS3R5A
	60–100	1	Line and load	TS1R5B
	60–100	3	Line and load	TS3R5B

Conversion Kit to Create a Six- or Eight-Pole Load Break Switch

Conversion Kits ^{①②}

Description	Ampere Rating	Type	Catalog Number
This accessory kit enables the assembly of two three-pole switches plus additional poles in order to achieve:	16–100	6/8-pole load break switches	CKR568
• Six- or eight-pole load break switches			
• Direct handle included			

Conversion Kit to Create Three- or Four-Pole Changeover/Transfer Switch

This accessory kit enables the assembly of two three-pole switches to create a changeover (transfer) switch. R5 Series changeover switches ensure switching, transfer of sources (I–0–I) with the continuity of power supply.	16–100	Changeover switches (I–0–II) Open transition	MTSCKR50T
• Direct handle included			

Door/Panel Mounting Kit

Description	Ampere Rating	Number of Poles	Catalog Number
This kit enables direct mounting of the switch on the door panel. Moreover, the connection clamps of the switch are always accessible. The external handle is quick and easy to install due to an internal locking nut mounted on the inside of the enclosure.	16–100	3 and 4	DMK ^③

Notes

- ① When external handle is required, please see options on **Page V5-T8-7**.
- ② For use with two three-pole R5 Series switches (plus optional fourth-pole, if desired).
- ③ Includes shaft and accessory cap.

Non-Fusible 30–100 A Compact

Product Description

The R9 Series (UL 98 listed) non-fusible 30–100 A compact range ensures making or breaking on load and safety isolation for low-voltage electrical circuits, particularly for machine control circuits up to 600 V.

Features, Benefits and Functions

- Rating three-pole from 30 A to 100 A
- Direct or external operation handle (padlockable in ON position)
- Double breaking per phase

Standards and Certifications

- UL 98, File E222859
- CSA 22.2 No. 4, File 217736
- IEC 60947-3
- EN 60947-3
- CE

Product Identification

- ① Direct handle
- ② Door interlocked external handle
- ③ Shaft extension
- ④ Terminal shrouds
- ⑤ Unswitched neutral pole
- ⑥ Switch body
- ⑦ Switched fourth-pole module
- ⑧ Modular type auxiliary contacts

Note: For further details, please see the installation instructions supplied with each device.

SFGAB**Guide Cone**

Description	Ampere Rating	Use with Handle Type	Catalog Number
The guide cone facilitates an easier connection between the shaft and a Size 00 or Size 0 external selector handle. It allows the shaft up to 10 mm of vertical play when making the connection	16–80	SH00 and SH0	SFGAB

Notes

- ① Allows door to be opened when switch is in the ON position.
 ② Contains all metal internal parts.

Additional Pole Configurations

Switched Fourth-Pole Modules

Description	Ampere Rating	Number of Poles	Type	Catalog Number
Transforms a three-pole, R9 Series load break switch into a four-pole	30	1	Switched	S4PR930
	60	1	Switched	S4PR960
	100	1	Switched	S4PR9100

Notes

- ① Short-circuit rating achieved when used with respective fuse type and maximum fuse rating.
- ② For torque values, see instruction leaflet IL0080471 (537678D).
- ③ Category with index A = frequent operation.
- ④ A/B: Category with index A = frequent operation; category with index B = infrequent operation.
- ⑤ The power value is given for information only; the current values vary from one manufacturer to another.
- ⑥ For a rated operating voltage, U_e = 400 Vac.

Non-Fusible 100–1200 A

Product Description

The R9 Series (UL 98 listed) non-fusible 100–1200 A are manually operated multi-pole load-break switches. Quick-make, quick-break design provides safety isolation for any low-voltage circuit.

Features, Benefits and Functions

- High thermal and dynamic withstand ratings
- Arduous categories of applications
- High electrical and mechanical endurances

Standards and Certifications

- UL 98, File E222859
- CSA 22.2 No. 4, File 217736
- IEC 60947-3
- EN 60947-3

**Product Identification**

- ① External front handle
- ② Shaft extensions for external handle
- ③ Configurable U-type ACs, for pre-break and signalling or TEST
- ④ Terminal Screens

Note: For further details, please see the installation instructions supplied with each device.

		4	2	2x (2) #2–600 kcmil	Cu/Al	LK8R9G

Notes

- ① Early-break/same-make.
- ② Gold plated for minimal resistance—for PLC applications.
- ③ Requires use of ACHFG auxiliary contact holder for F- and G-Frame switches.

Product Description

R9 Series (UL 98 listed) Fusible 30–800 A manual operated multi-pole fusible disconnect switches use double break contacts per pole that ensure complete isolation of the fuse when the switch is in the OFF position.

When installed with fuses, they provide protection for low-voltage electrical installations against short circuit and overload.

Features, Benefits and Functions

- Load break functionality
- Double break contacts
- Up to 200 kA short-circuit rating with Class CC, J or L fuses
- Compact footprints
- The optional TEST position function (up to 400 A) enables testing of the control circuit auxiliaries without switching the main contacts. This function provides a simple alternative to a separately wired pushbutton
- Defeatable pistol handles automatically re-latch when the panel door is closed
- Front or side operation
- Flange operation
- NFPA 79 compliant kits
- Two-, three- and four-pole devices

Product Identification

R9 Fusible 30 A/CC and 30 A/J H-Frame—Direct and External Operation

- ① External front handles
- ② Direct handle
- ③ Shaft extensions for external handles
- ④ Configurable U Type ACs, for pre-break and signaling or TEST

R9 Fusible 30 A/J–800 A/L (I–N-Frames)—Direct and External Operation

- ① External front handles
- ② External right side handle (not applicable for N-Frame 600/800 A)
- ③ Direct handle
- ④ Shaft extensions for external handles
- ⑤ Configurable U Type ACs, for pre-break and signaling or TEST
- ⑥ Side auxiliary contacts
- ⑦ Terminal shrouds

S0 Type Handle

Door Interlocked External Front Handles

Description	Ampere Rating (Frame)	Handle Type	NEMA Type	Color	Standard Catalog Number
The handle locking function of the front external operation handle prevents the user from opening the door of the enclosure when the switch is in the ON position, and when the switch is padlocked in the OFF position (PH1, PH2 and PH3 type handles only). Opening the door when the switch is in the OFF position is possible by defeating the locking function with the use of a tool (authorized persons only). The locking function is restored when the door is closed back.	30 (H-Frame)	SO	1, 3R, 12	Black	SHB0N12HV

DC Rated Disconnects

Product Description

UL listed disconnect switches 600 Vdc for photovoltaic applications 100 to 400 A

R9 Series (UL 98 listed) DC rated disconnects are manually operated multi-pole load break switches. They provide safety isolation for any low-voltage circuit in a photovoltaic application.

Application Description

In three- and four-pole versions from 100 to 400 A

Standards and Certifications

- UL 98, cULus®, File E222859
- CSA 22.2 No. 4, File 217736 ①
- IEC 60947-3
- EN 60947-3
- IEC 60-364-7-712 (Rules for the installations and sites special—photovoltaic applications)

Note

① Q4 2010

Features, Benefits and Functions

- Switching technology
- Up to 600 Vdc according to UL 98 / CSA
- Up to 1000 Vdc according to IEC 947-3

Simplified Large Photovoltaic System Layout

Product Description

R9 Series (UL 98 listed) non-fusible disconnects are heavy-duty manual transfer switches, they transfer load manually between two low-voltage circuits and provide safety disconnection.

These switches are extremely durable and are tested and approved for use in the most demanding applications as resistive load or total system applications.

- Three load break positions (I, O, II)
- On load switching
- Direct or external handle
- 480 Vac total system
- 600 Vac resistive load

Standards and Certifications

- UL 98, cULus, File E222859
- UL 1008 (600–1200 A)
- CSA 22.2 No. 4, File 217736
- IEC 60947-3
- EN 60947-3
- CE

Product Identification

- ① External front handle
- ② Direct handle
- ③ Shaft extension for external handle
- ④ Pre-break ACs (standard on 600–1200 A)
- ⑤ Terminal screen

Notes

^① All ratings, 100–1200 A, are UL 98 listed. Switches rated 600–1200 A are UL 1008 listed as well.

^② Line or load (top or bottom); for both line and load, order two kits.

^③ Low level auxiliary contact—gold plated for minimal resistance—for PLC applications.

Accessories

Direct Handles

Ampere Rating	Handle Color	Handle Type	Catalog Number

PH2 and PH3 Type

External Handles

Description	Ampere Rating	Handle Type	Handle Color	NEMA Type	Lockable in the "3" Positions	Catalog Number
The handle locking function prevents the user from opening the door of the enclosure when the switch is in the "ON" position. Opening the door when the switch is in the "ON" position is possible by defeating the locking function with the use of a tool (authorized persons only). The locking function is restored when the door is once again closed.	100–200	PH2	Black	4, 4X	Yes	PHB2N4X3P
	100–200	PH2	Red/Yellow	4, 4X	Yes	PHR2N4X3P

Notes

- ① Short-circuit rating achieved when used with respective fuse type and maximum fuse rating.
- ② Only UL 98 listed. For UL 1008 availability, contact Eaton.
- ③ Two-pole in series.
- ④ Three-pole in series.

The switch will operate correctly when rotated clockwise 90 degrees.

The switch will not operate correctly when rotated counterclockwise 90 degrees.
