STAINLESS STEEL CONNECTORS

PRODUCT BROCHURE

STAINLESS STEEL CONNECTORS FOR THE HARSHEST ENVIRONMENTS

UNMATCHED DURABILITY, CORROSION RESISTANCE, AND STRENGTH IN HARSH ENVIRONMENTS

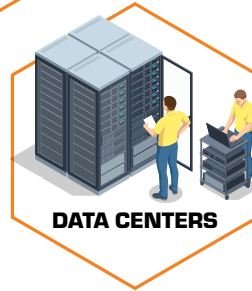

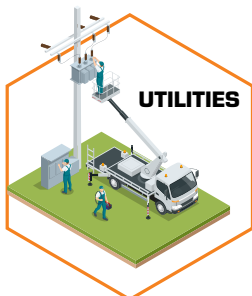

With a wide range of styles and sizes, they're engineered for long-lasting, reliable performance across demanding applications.

- Wide in-stock selection of stainless steel fittings up to 4"
- Built to withstand the harshest environments with superior corrosion resistance
- Rated for demanding washdown, moisture, and chemical exposure
- Backed by U.S.-based engineering and manufacturing heritage

Backed by 100 years of U.S.-based engineering and manufacturing expertise, Bridgeport is a trusted partner for stainless steel fittings across industries like food & beverage, wastewater, petrochemical, marine, and more.

ENGINEERED FOR THE TOUGHEST APPLICATIONS

Bridgeport stainless steel fittings deliver maximum durability against corrosion, extreme climates, harsh environmental conditions, and high humidity. Ideal for washdowns or any high-moisture environment.

STAINLESS STEEL CORD CONNECTORS

- Type 304 standard, Type 316 available upon request.
- Wide range of sizes from 3/8" to 4"
- Options include stainless locknuts, silicone bushings for high-temperature use, flat cable bushings, and multiple-hole bushings for varied cable styles.
- Rated NEMA 4, 4X, and 12.

STAINLESS STEEL LIQUIDTIGHT CONDUIT FITTINGS

- Engineered for wet or dry locations, these connectors seal out dust, dirt, oil, water, and other contaminants.
- Standard Type 304 stainless steel
- Available in straight and 90 degree configurations
- Available in trade sizes 3/8" to 2"
- Rated IP68 and NEMA 4X for reliable protection in demanding environments.

STAINLESS STEEL VENTILATION PLUGS

- Reduce humidity effects and pressure build-up inside enclosures by allowing safe air circulation.
- Available in 3 thread sizes, with additional sizes and permeability levels available upon request.
- Rated IP69K.

STAINLESS STEEL JACKETED METAL CLAD CABLE CONNECTORS

- Type 304 stainless standard; Type 316 available upon request.
- Available in trade sizes 1/2" to 4".
- Rated NEMA 4 and IP65 to provide secure, corrosion-resistant connections for MC cable.

VALUE-ADDED OPTIONS FOR STAINLESS STEEL CONNECTORS

From special adaptations to unique variations, Bridgeport delivers stainless steel fittings designed to meet your needs.

MORE INDUSTRIAL-STRENGTH CONNECTORS AND ACCESSORIES

CORROSION RESISTANT CORD CONNECTORS

Bridgeport's family of corrosion-resistant cord connectors is designed to withstand exposure to water, caustic materials, detergents, and surfactants.

Available in nickel-plated aluminum, nylon, Valox®, and steel across a wide range of conduit sizes, all connectors meet or exceed IP67 or IP68 standards.

WIRE MANAGEMENT PRODUCTS

Bridgeport's stainless steel straps, clamps, and hangers deliver long-lasting support in the toughest environments. Designed to secure conduit and cable in industrial, outdoor, and corrosive conditions, they offer superior strength, resistance to rust and chemical exposure, and the versatility to fit multiple trade sizes. With UL-listed performance and rugged construction, these solutions ensure reliable installations that stand up to vibration, moisture, and harsh elements.

For more than 100 years, Bridgeport has built its reputation on US-based engineering and manufacturing strength. Our commitment to quality, innovation, and customer trust continues today—delivering rugged, jobsite-ready fittings that stand the test of time.
