SKIP THE HASSLE OF MANUAL HOLES AND CUTOUTS

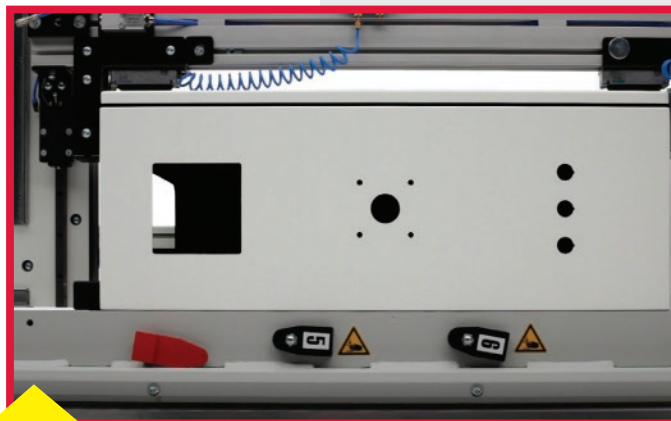

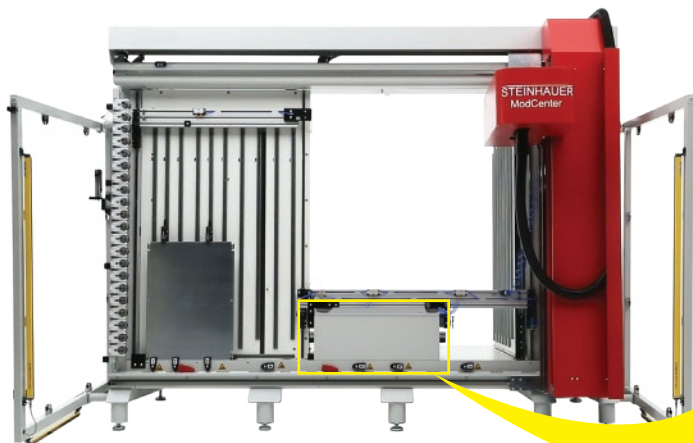

HOFFMAN

Don't waste time making holes and cutouts manually—let Werner Electric deliver your Hoffman enclosures and back panels ready to populate. By utilizing Werner Electric's extensive local market inventory, you can enjoy pre-modified enclosures and back panels in one to two weeks. Make manual holes and cutouts easy so you can focus on integrating and delivering control solutions to your customers.

- Performs cutouts, drills holes, and taps the holes.
- Accepts the following file formats:
 - DWG
 - DXF
 - (cannot use 3D files)
- Maximum enclosure size is 90" x 90"
- Maximum back panel size is 78" x 72"
- This machine modifies:
 - painted carbon steel
 - stainless steel
 - non-metallic enclosures
- Werner can produce drawings for customer approval

1. Precise, clean holes and cuts every time.
2. Any material, any cutout, shape and size.
3. Order easily by supplying existing design files.
