

TAKE YOUR STOREROOM BY STORM

Reliable Remanufacturing and Repair Services

Do you have a jumble of open, mislabeled boxes in your storeroom? Will your critical spare really work when you need it? Are you exposing your facility to possible cyber security attacks by bringing in networked parts from surplus websites?

Ensure your storeroom's reliability. Contact us for a consultation at LCSTeam@wernerelectric.com or 920-815-4058.

Remanufacturing and Exchange Services

Your Risk

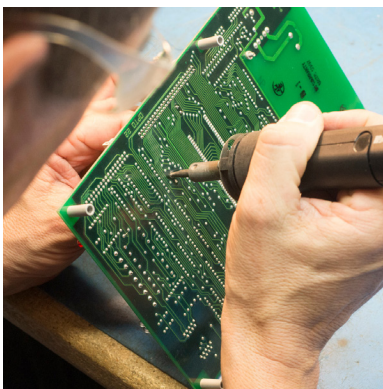

- > Increased downtime and loss of production by not having reliable spare parts in your inventory

Risk Mitigation

- This proprietary remanufacturing process restores your equipment to like-new or better condition using genuine Allen-Bradley components provided by Rockwell Automation
- Extend your equipment lifespan and enhance equipment performance
- Comprehensive warranty on the entire unit

Industrial Repair Services

Your Risk

- > Unexpected service costs, unplanned downtime and reduced productivity due to a lack of quality repairs for your automation equipment

Risk Mitigation

- Decrease repair service costs by increasing the time to component failure by using OEM-specified components
- Repair obsolete or hard-to-find replacement products for increased dependability and to extend your product lifespan

Inventory Recertification

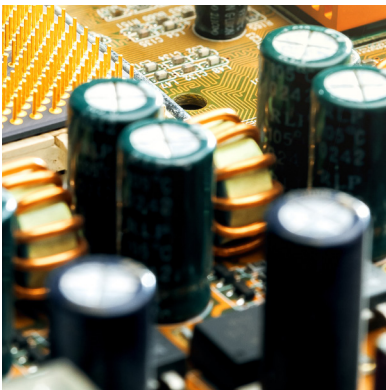

Your Risk

- > Costly downtime due to having unreliable spare part inventory on your storeroom shelves

Risk Mitigation

- Increase the integrity of your spare parts inventory, minimize costly production downtime and improve your plant performance
- 12-month remanufacturing warranty

Capacitor Reformation

Your Risk

- > Costly downtime as a result of degradation of electrolytic bus capacitors in AC motor drives during prolonged storage

Risk Mitigation

- Capacitor reformation is performed on a drive and the capacitor is restored to like-new condition
- Capacitor failure at drive start-up is greatly reduced by having capacitors reformed, resulting in a reliable spare on your shelf

Fanuc Robot Component Repair

Your Risk

- > Lengthy response time to servicing and repairing Fanuc robot components resulting in adverse, costly effects on your production uptime

Risk Mitigation

- Reliable component review, inspection and trend analysis with inoperative and aged component replacement to increase MTBF
- Comprehensive 12-month warranty on the entire unit, not only the repaired components
- Dedicated functional test platforms allow for comprehensive, flexible testing to minimize repair costs
