

# nVent ILSCO Tools Crimping Training

nVent offers on-site, hands-on crimping tool training and education on key standards and compliance. Participants will master creating proper electrical connections using nVent ILSCO tools and lugs in this training. Also key to this training are current electrical codes, standards, and compliance requirements for safe and legal installations.

## Training Key Learning Points:

### Selection and Prep

Selecting appropriate crimping tools for specific applications and conductor preparation techniques following industry standards.

### Crimping

Tool precise crimping execution using nVent ILSCO tools and various connectors and lugs.

### Current NEC Requirements

This includes compliance documentation, inspection preparation, best practices for code-compliant installations, and methods for correcting common violations.

Participants will end the session with a skills demonstration and assessment.
