

EXPORTING PRODUCT INFORMATION

STEP ONE

Exporting a list of products can be done in a variety of ways, however it is capped at 500 products in one export.

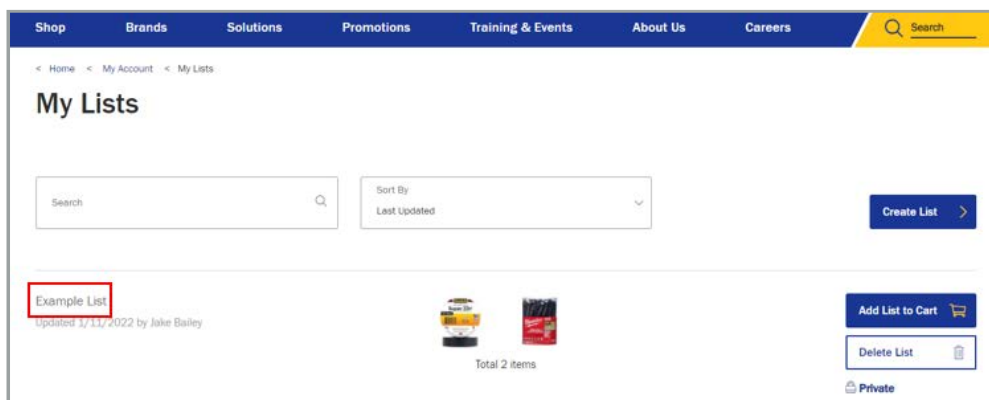

To export from a **Product List**, first locate the list that you have built by either clicking on the **“Product Lists”** widget of your homepage, **OR** selecting **“My Lists”** in the **“My Account”** area.

Note: If you would like to set up a specific list of products to export, you may do so by first building a Product List. Directions can be found in Website Guide: Creating and Utilizing Product Lists.

STEP TWO

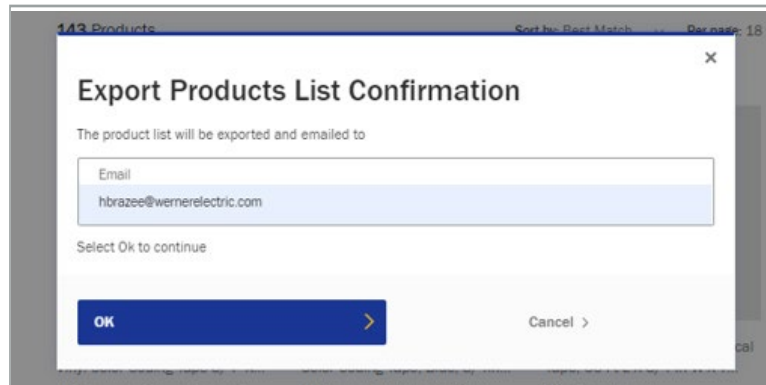

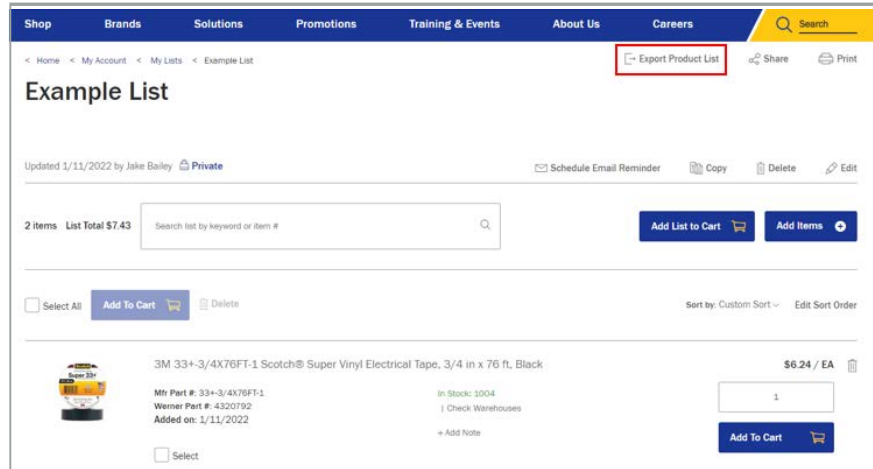

You will then select the list you would like to export.

Continue >

STEP THREE

The steps for exporting remain the same throughout the site. Click “Export Product List,” and make sure you have the correct email address filled out in the pop-up. Then wait to receive the list in your email.

STEP FOUR

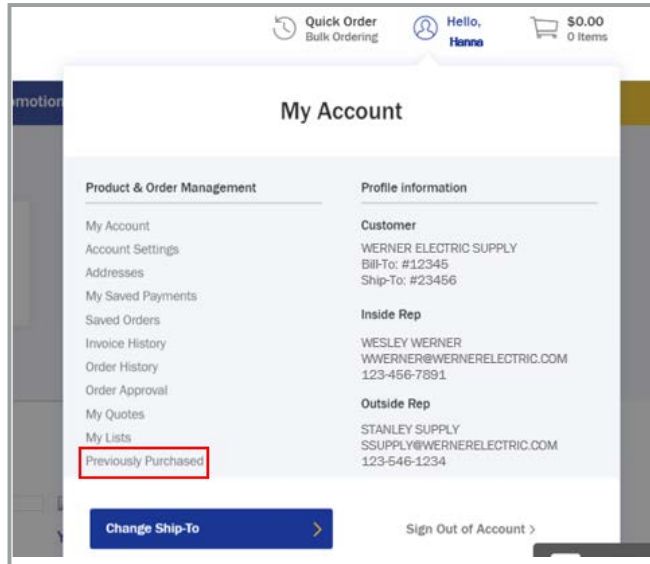

If you would like to set up a specific list of products to export, you may do so by first building a Product List. Directions on how to create a product list can be found in [Website Guide: Creating and Utilizing Product Lists](#).

- a. UPC Code
- b. Werner Part Number
- c. Manufacturer Name
- d. Manufacturer Part Number
- e. Product Description
- f. Customer Part Number (should you have any)
- g. Unit of Measure
- h. Your Price
- i. Current RDC Stock Level

STEP FIVE

You could also export a list of items you have purchased in the past by clicking on “Previously Purchased” in the “My Account” area.

STEP SIX

This page will show any items that you have purchased from us before. You have the ability to filter the list down by a variety of attributes – or export the entire list. Again, this can be done by clicking the “Export Product List” button, entering your email address in the pop-up, and waiting for the export to arrive in your inbox.

STEP SEVEN

You could also export a list of search results by clicking “Export Product List” in the right-hand corner.
