CLASS SCHEDULE

LIGHTING CONTROLS—UL924 & UL1008: WHAT YOU NEED TO KNOW

**1
CEU**

4:00 PM - 5:00 PM

TNFPA 70, the national electrical code details two different types of Emergency Lighting Control Devices — devices that guarantee that life safety lighting will be on at desired illumination levels in the event of an emergency. This course will help mitigate the confusion regarding the specification of these devices and understand their applications in the real world.

VALUE OF EMBEDDED CONTROLS

**2
CEUs**

5:00 PM - 7:00 PM

Small control zones provide increased application flexibility and granularity of control. Embedded controls are redefining how spaces are designed to meet the ever-changing needs of today's building. This course will demonstrate the importance of embedded lighting controls focusing on design, specification, and installation delivering significant value to customers.

COST

\$35
