

HIGH-QUALITY CONTROL PANEL ASSEMBLY

Maximize production and save labor with fully-assembled panels for industrial facilities.

Services for Your Success

We simplify panel ordering with an all-in-one process that utilizes your design specs, procures parts and ships directly to your facility. Feel confident with UL 508A certification capabilities and standard testing to ensure compliance. With a single purchase order and streamlined project management, you can trust Werner for a smooth experience—allowing you to dedicate valuable labor time elsewhere.

Partner with Us for Quality Panels

Rely on Werner Electric's in-depth expertise for high-quality panels. As a single-source supplier, our custom control panels offer many benefits, including:

- Standardization with existing panels
- Prevention of panel component obsolescence
- Reduced capital outlay costs
- Supplement to your technical workforce
- Space-saving configurations
- Utilize customer price agreements

Connect with Us for Cost Savings

For applications such as control panel assembly, operator stations, pneumatic assemblies and more, contact Werner Electric for your personalized quote.
