

January – December 2025

# Rockwell Automation Industrial Training Courses

Stay current on technology, elevate professional development and incorporate best business practices.

For up-to-date course availability, detailed descriptions and registration, please visit [www.WernerElectric.com/Training-Events](http://www.WernerElectric.com/Training-Events)

# On-site Instructor-Led Training

Courses are taught by certified Werner Electric Supply instructors – experienced teachers and experts in their fields. Tailored in scope and content to meet your needs, many courses are approved for CEU credit in Wisconsin.

## Curriculum

- **Basics and Troubleshooting:** One full day of training for beginners or as a refresher. Learn skills to troubleshoot and maintain automation equipment such as connectivity, basic software skills, cross-referencing, locating faults and finding diagnostic information. This is not a prerequisite for any other class.
- **Foundations:** Covers the most important concepts for a solid knowledge base, including all material in the Basics and Troubleshooting course.
- **Advanced:** Provides details on in-depth programming, design, best practices and integration.

## Custom Training

Create customized curriculum to introduce new hardware, serve as a refresher, or combine topics for specific employee requirements. Contact us to set up training on site or at any of our facilities.
