

# POINTMAX I/O & ETHERNET/IP IN-CABINET SEMINAR

## NEXT-GENERATION IN-CABINET CONTROL

Join us for an in-person seminar showcasing how Rockwell Automation's PointMax™ I/O and EtherNet/IP In-cabinet solutions reduces panel labor, streamlines designs, and improves diagnostics across the plant floor.

## YOU WILL LEARN

- **Faster installs & reduced panel labor** dramatically reduce point-to-point wiring, terminations, and engineering time, accelerating builds and deployments.
- **Cleaner, more compact cabinet layouts** are achieved through modular, networked solutions that shrink panel footprints and free up space for value-added system features.
- **Improved diagnostics & uptime** are driven by real-time device diagnostics, streamlined troubleshooting, and actionable insights that help reduce unplanned downtime.
- **Reduced complexity & lower total cost** are achieved through simplified wiring and common integration tools like Studio 5000, which cut engineering and testing time while lowering long-term support costs.

## MARCH 5

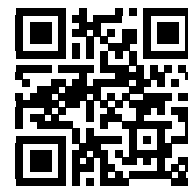

9 AM – 2 PM

FREE TO ATTEND

WERNER  
4800 PROSPECT AVE.  
APPLETON, WI

## HOW TO REGISTER

Limited seating –  
registration required at  
[OneWerner.com/Training](https://www.onewerner.com/training)
