## Facility Lighting Assessments

Werner Electric lighting experts can provide a **FREE**, temporary overhead LED lighting assessment of your industrial, commercial, or construction work areas. By calculating light readings and building dimensions, we can propose the best temporary lighting layout and lighting products for your team.

## Werner Electric Supply Lighting Specialists can also help you:

- Design and integrate brand new, cost effective lighting solutions
- Update old lighting systems with LED retrofits, new lighting techniques and energy efficient products
- Streamline/combine lighting layouts with AutoCAD capabilities
- Coordinate entire lighting projects from start to finish
- Stage lighting projects for easier management
- Perform free facility lighting assessments

For more information on our innovative lighting products and design services, call **866-4-WERNER** and ask to speak with our lighting design experts.
