Earn CEUs
and PDHs

Join us for this comprehensive 2-day event at **Lambeau Field** focused on the application of information driven solutions. This forum is intended to provide learning opportunities for immediate utilization and impact. Whether you are an End-User, OEM, System Integrator, or Contractor you are sure to find value in exposure to new industries, innovative applications and diverse user perspectives.

"This was a great show! Very well organized, perfect size to have plenty of access to the product reps and vendors. Also nice to have subject matter experts on hand and available for questions after each session."

Highlights:

- Technical sessions covering topics from optimizing loop control to enterprise-wide connectivity
- Industry case studies providing insight into innovative applications in real-world environments
- Hands-on labs allowing you to test-drive equipment
- Supplier Expo with NEW expanded interactive exhibit space
- Embark on your digital transformation (EPLAN, Vuforia, Emulate3D)
- Networking and hospitality event Tuesday evening, August 17, at the Packer's Hall of Fame Museum at Lambeau Field

Sneak Peek:

- The Latest Industrial Control Technology
- Dedicated Process Track
- New Service Offerings
- Integrated Information Driven Demos
- Explore the Connected Enterprise including a wide variety of IIOT solutions
- See Augmented Reality solutions for Manufacturers and Machine Builders
- Solutions to drive more Efficient Engineering
