

SISTEMA WORKBENCH

SISTEMA is a FREE software tool designed by Germany's BGIA (Institute for Occupational Safety & Health) to evaluate the Performance Level (PL) of a safety function using ISO 13849-1. A key part of a safety system is verifying that the solution meets the safety performance level of the hazard.

DATES & LOCATIONS

Madison • Tues., September 28, 2021
8:00 a.m. - 12:00 p.m. (lunch provided)

Appleton • Wed., September 29, 2021
8:00 a.m. - 12:00 p.m. (lunch provided)

In our **FREE** workbench, you will learn to:

- Identify safety functions
- Calculate the safety performance level using the FREE SISTEMA software tool
- Document safety calculations using SISTEMA's performance level verification report

* Please note, you will be required to bring a laptop with SISTEMA software preloaded.
