

MODEL NUMBER:

☐ **PK00.BBU Battery Back-Up Kit**

Battery back-up unit uses CR-P2 lithium battery to provide uninterrupted operation in the event of a power failure. Battery included. IP65 input and outlet connections.

FOR USE WITH SELECTRONIC AC POWERED FAUCET & FLUSH VALVE MODELS

FEATURES:

Continues Operation Without Delay: Battery back-up unit allows Selectronic faucet or flush valve to operate continuously without delay. Sensor does not reset during transition to battery.

- Cut-Over Time < 100 ms.

Easy Install: Installs between Selectronic faucet or flush valve and AC Power Supply (Plug-In or Hard-Wired) with plug and play IP65 connectors.

Standard CR-P2 Lithium Battery: Included for back-up power. Same battery is used in other Selectronic products.

- 10 year shelf life ensures that the battery will be ready when needed.
