

BG-202V-12

2 WAY "Y" GARDEN HOSE VALVE

This 2-way garden hose valve allows you to hook 2 garden hoses up to one faucet – eliminating the hassle of unhooking your hoses. The all brass construction with “wrench style” female collar, teflon seats and premium leak free gaskets give this valve superior durability, smooth operation and sealing performance. This Y garden hose valve is the best quality and value on the market, a superior choice to many plastic garden hose valves.

FEATURES:

- Converts one faucet or hose into two separately controllable outlets
- 3/4" male hose thread outlets
- Fits North American standard garden hose thread
- 1/4 turn ball valve shut-offs allow for easy adjustments of flow and pressure
