COPPER-FLEX™

Copper Water Heater Connectors

**Corrosion is No Match
for COPPER-FLEX™**

Patented Galvanic and Electrolytic Corrosion Protection.

- Patented internal dielectric insulator sleeve provides superior resistance to galvanic and electrolytic corrosion
- Insulator sleeve effectively isolates dissimilar metals within the water way to eliminate the need for a dielectric union (plastic lined nipple).

The Preferred Seal

- Pliable Nitrile rubber washer requires less torque to seal and is more resilient to rough nipple surfaces.
- Longer connector nuts provide more thread-to-thread contact and a better seal to lined nipples
- Manufactured with solid brass nuts

Listed to ASME A112.18.6/CSA B125.6

- Available in a variety of approved configurations to fit most plumbing system connections

Compliant

California (AB1953) and Vermont (S152)
