

## Electronic Flush Valves & Retrofit Kits

DUAL FLUSH Hard wire FLUSH VALVE for 1-1/2" top spud WATER CLOSET with H2Optics® SENSOR ON VALVE - maximum 11-1/2" height (c/l of inlet to base of outlet)

**Model No: 81T201HWA-DF**

### COMPLIES WITH:

- IAPMO listed to ASSE 1037/ ASME A112.1037/ CSA B125.37
-  Indicates compliance to ICC / ANSI A117.1
- Patented
- (Contact Delta Representative for State and/or Local Approvals)

### SPECIFICATION:

- Polished chrome plated vandal resistant metal cover with top mounted sensor operated H2Optics® electronics
- Right or left-hand supply installation
- ADA compliant, automatic operation hardwire powered infrared sensor
- Scratch resistant replaceable lens window
- Supplied with an advanced infrared sensor activated flush system that uses precise user distance measurements along with a bowl length setting to activate the correct flush for each usage
- Hardwire adaptor 24VAC to 6VDC converter (supplied)
- Vandal resistant copper tube conduit
- Override button activation will always produce a full flush
- Optional 24 hour automatic flush factory set to off
- Set-up sensor range adjustment indicator lights
- 24 VAC input, 6 second arming delay
- Electronic operated non-hold-open metal override button with 5 second lockout
- Quiet action, TECK® exposed diaphragm flush valve
- Chloramine resistant diaphragm
- Forged brass diaphragm retainer
- Renewable seat
- Polished chrome plated body
- Optional dual flush setting capability factory set to on providing average 30% water reduced flush based on time and distance
- External water conserving flush adjustment: Factory set to 6 Litre (1.6 Gal.) - Field Adjustable from 4.2L to 25L (1.1 to 6.6 Gal.)

### OPERATION:

- **Recommended water supply:**  
Minimum flowing pressure – 25 psi (172 kPa)  
Minimum flow rate – 25 gpm (95 L/min)

Model No: 81T201HWA-DF

Teck® flushometer valves are designed to operate at any supply pressure between 20 psi and 125 psi in accordance with ASSE 1037/ASME A112.1037/ CSA B125.37. The Teck® flush valve delivers the industry's highest peak flows to enhance bowl scrubbing. At high water pressures, splash out, noise or reduced life of plumbing components may be observed with a few models of water closet or urinal fixtures. To minimize or eliminate these effects, select a different model of water closet or urinal from the same or another manufacturer, or install a pressure reducing valve. If the installation does not allow for either of these options, the control stop adjusting screw may be used to reduce pressure to the valve.
