Revolutionizing Plumbing & Firestop Solutions

Understanding the plumber's perspective has always been in HoldRite's DNA. Even as we evolved into an international company, retaining a plumber's perspective has remained our strategic competitive advantage. We know that our value comes from constantly providing innovative plumbing products that improve job site efficiency and safety.

Our commitment to visiting our customers and listening to their input means that we understand plumbing applications better than anyone. This philosophy allows us to solve contractor problems, generate new revenue streams for distribution and provide superior engineered building projects— without increasing construction costs.

A Valued Member of the RWC Family of Brands

RWC is a powerful family of innovative brands that is designed to make our customers' lives easier. As part of the RWC family, HoldRite™ adds value by providing plumbing and firestop solutions that operate as an efficient system with our other subsidiaries.

We own our manufacturing process from concept to delivery and strive each day to ensure the quality of our products. HoldRite products have been designed and manufactured in the USA since 1982.

HoldRite has created a national footprint with strategically placed locations across the United States. With allied resources in Georgia, Alabama, Nevada and California, HoldRite is able to distribute patent-protected products to consumers in North America.

Developing engineered solutions that save time on the job site since 1982.

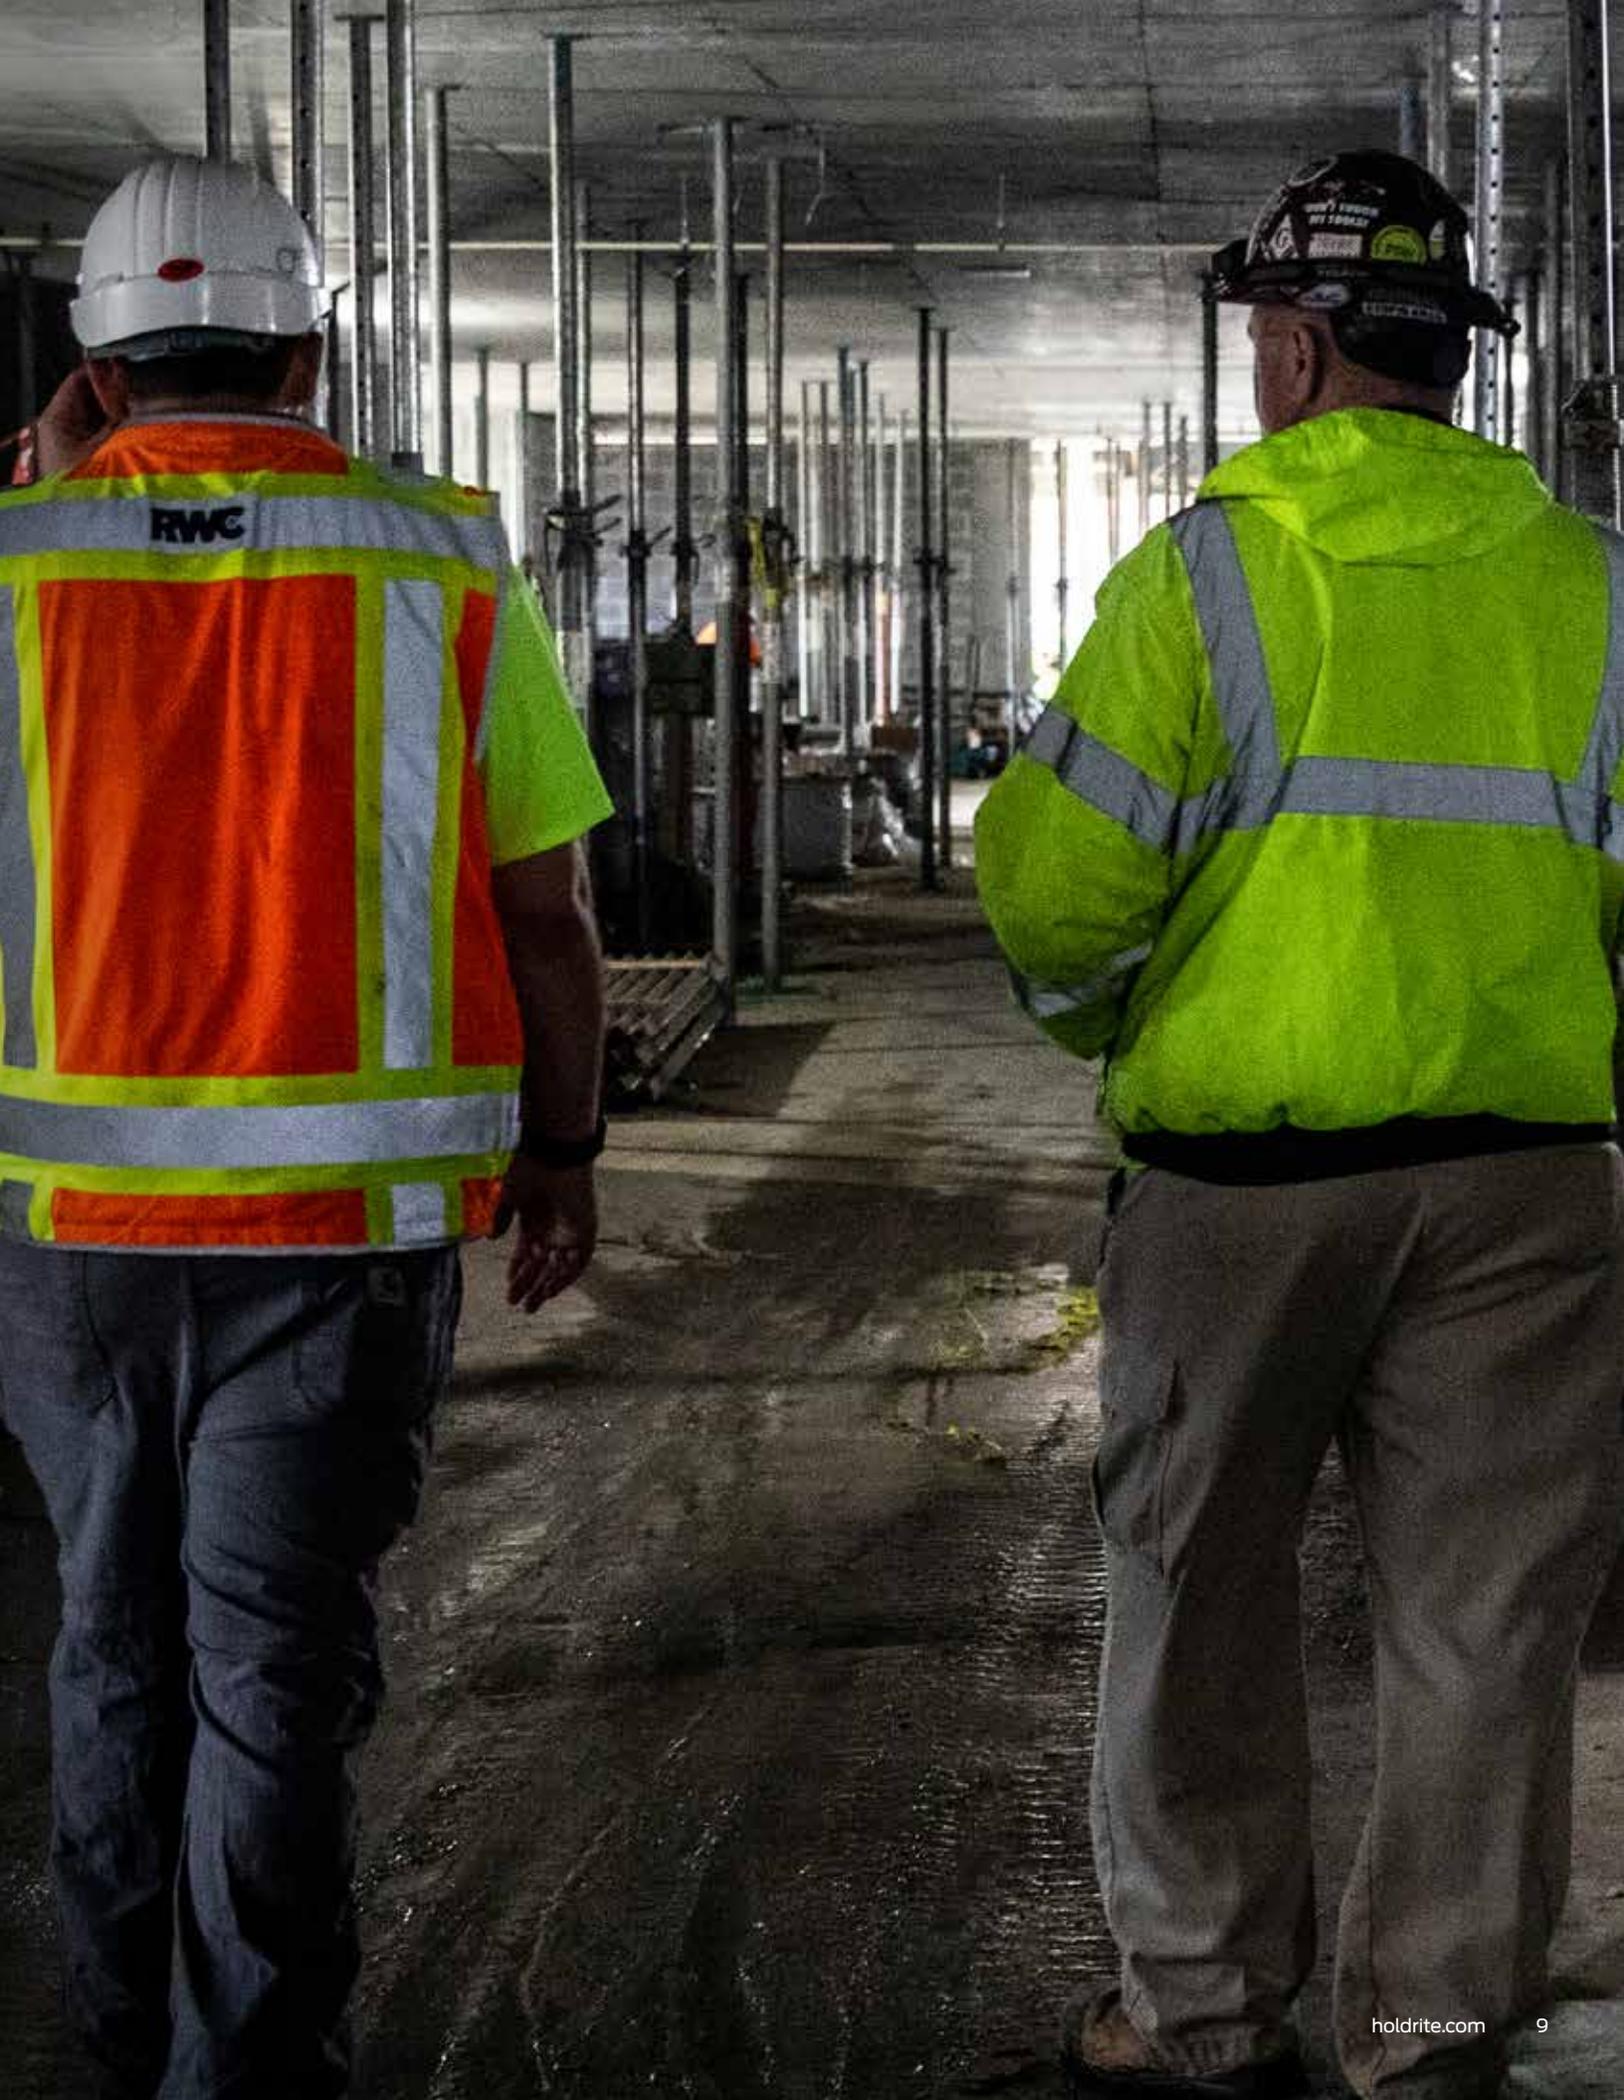

In 1982, Master Plumber George Hubbard designed a pipe support solution (The HoldRite 101-18) to replace the time-consuming and labor-intensive method of cutting blocks of wood for every job. Hubbard's invention revolutionized plumbing in North America by ushering in the plumbing methodology of secondary pipe support.

Today, HoldRite is an industry leader in products and services including secondary pipe supports, acoustic noise and vibration plumbing solutions, sleeving and firestop systems, equipment support, water heater accessories, and drain waste and vent (DWV) solutions.

Understanding your perspective has always been in our DNA. Even though we've evolved into an international company and recognized industry leading brand, we know our value comes from providing superior products and services for building projects— without increasing costs.

Thank you for giving us the opportunity to pioneer new products and transform the plumbing industry together.

Protect Property Against the Spread of Fire, Smoke & Poisonous Gases

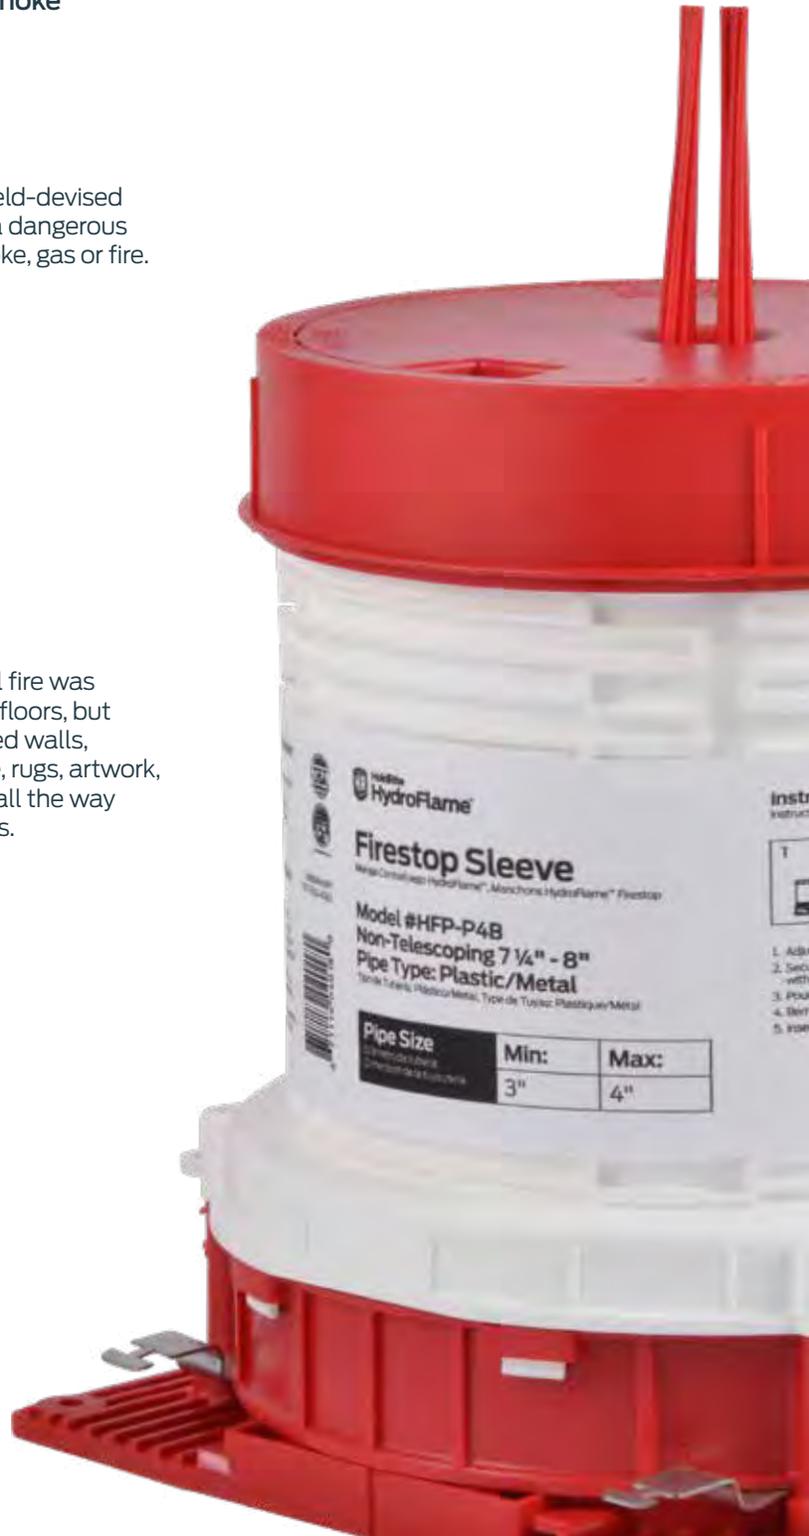

UL Listed for water and smoke, HoldRite™ HydroFlame™ cast-in-place sleeves provide a watertight seal to help prevent unwanted water intrusion while still guarding against the spread of fire, smoke and gases.

Commonly observed field-devised methods may provide a dangerous pathway for water, smoke, gas or fire.

Damage from this hotel fire was contained to the upper floors, but water damage destroyed walls, ceilings, floors, furniture, rugs, artwork, restaurants and stores all the way down to the lower floors.

Safeguard Property From Water Damage & Mold

Natural disasters, such as hurricanes and other storms, may cause schedule delays and water damage to buildings under construction.

Water damage may lead to significant health concerns, lawsuits and costly insurance claims.

Many buildings are designed to house data communication networks and computer equipment. Such high-tech investments are critical to corporations, healthcare facilities, military installations, government infrastructure and universities. HoldRite™ HydroFlame™ Pro Series helps protect these high-dollar assets from unwanted destruction caused by water, fire and smoke.

Transforming Firestop Solutions Through Industry Collaboration

Contractor

HoldRite™ HydroFlame™ Pro Series

Interlocking Telescoping Sleeve Design

- Eliminates the need to cut sleeves on the jobsite – quick installs
- 6 times faster install, compared to makeshift methods
- No caulking or mineral wool required
- Meet and exceeds building code requirements and UL Listed
- Telescoping sleeve allows height range of 2 ½" to 11 ¾"
- Extension sleeves available for greater than 11 ¾" thick slabs
- Accommodates various pipe types, conduits and cables sizes ½" to 6"
- Versatile product minimizes inventory variations
- Measurement guide system built into sleeves (US and Metric)
- Easy to order

Locator Whiskers

- Easily locate buried sleeves after concrete pour
- Quickly identify plastic pipe (red whiskers) or metal pipe (black whiskers) sleeve penetrations

Safety Cap

- Threaded cap allows for easy, non-destructive removal
- Meets OSHA hole cover requirements
- Safety cap attaches directly to telescoping or adjustable cap sleeve designs

Interlocking Nail-in Base

- Allows mixed sizes to mount together
- Ideal for layout alignment or tight locations
- Quickly identify plastic pipe (red base) or metal pipe (black base) sleeve penetrations

Watertight Mid-Body Seal

- Seal design ideally grips pipe with up to 10 times greater contact with pipe than other manufactured sleeve devices
- Substantially greater contact at the small end of the pipe range
- UL W rated
- Allows for movement – important in seismic zones
- Allows for off-center penetrations
- Aids with acoustic noise and vibration isolation

Wholesale Distributor

- Significant new revenue streams
- Easy to order, stock and inventory
- Sleeves allow for multiple pipe size ranges and material types to pass through
- Meets and exceeds building, fire and safety codes – UL Listed
- Sleeves are clearly labeled and color-coded, for simple selection
- Quick and easy to order through HoldRite
- HoldRite™ HydroFlame™ Pro Series typically ship within 48 hours
- Made in the USA
- No-charge submittal and specification compliance assistance from HoldRite, for your customers
- No-charge material take-off service through HoldRite, for your customers

Engineer/Architect

- UL Listed firestop devices
- Meet and exceed building and fire codes in the USA and Canada – UL and cUL Listed
- Protect property and occupants against damage from water, fire, smoke, gas, noise and seismic issues
- Prevent water, moisture and mold intrusion during construction and post-construction
- Isolate hurricane, storm and water damage
- Protect Owner/Developer interests
- FBC System Compatible – CPVC compatibility
- Integrate superior product without increasing installed costs
- Product specifications and custom specification authorship assistance available upon request
- Fully tested and rated (data available upon request)
- Use with combustible, non-combustible and insulated pipes, cables, conduits, etc.
- Extensive accessories available
- Eliminate one area for field installer error
- Complies with OSHA requirements for hole covers
- Made in the USA
- Easily available at Wholesale Distribution throughout the USA and Canada
- 3D CAD, BIM models and installation detail drawings available

Owner/Developer/General Contractor

- Meet and exceed building and fire codes
- UL Listed firestop devices
- Protect property and occupants against damage from water, fire, smoke, gas and seismic issues
- Potentially reduce insurance costs
- Reduce overall construction costs
- Reduce today's field installation errors and tomorrow's potential concerns
- Reduce time to dry floors and complete building – especially in high-rise construction
- Enhance safety and quality on the job with built-in OSHA-compliant safety hole covers
- Watertight floor penetrations compartmentalize future water damage within finished building
- Expedite cover inspections with built-in UL Listed firestop devices
- Increase safety by keeping floor surfaces free of water and ice during construction, minimizing slip and fall hazards
- Eliminate field applied sealants reducing human error factors, while improving UL fire ratings
- Easily available at Wholesale Distribution throughout the USA and Canada – fast lead times
- Made in USA

Introducing an Expanded Suite of HoldRite™ HydroFlame™ Firestop Technologies

Introducing HoldRite™ HydroFlame™ firestop and acoustic sealants, intumescent wrap strips, intumescent pipe collars and putty pads.

You spoke. We listened. At HoldRite, our goal is to understand your perspective so that we can continue to provide you with firestop solutions that exceed your expectations. Previously, our product assortment focused strictly on cast-in-place solutions. Now, based on your feedback, we have expanded our offering from 36 UL System Listings to more than 300 so you can find the sleeving and the firestop solutions you need— all in one place.

HoldRite's all-new series of firestop sealants, wrap strips, pipe collars and putty pads are designed to work efficiently with a wide variety of wall and floor application solutions for both commercial and residential construction, for both wood-framed and concrete construction.

Sealants

HydroFlame sealants protect vertical and horizontal construction assemblies from smoke and acoustic penetration and help prevent intrusion of flames and gases. Our sealants are compatible with a wide range of materials, including interior rated gypsum, concrete and block walls, as well as rated concrete floors, concrete over metal decking floors and wood floor ceiling assemblies. Additionally, HoldRite HydroFlame sealants work with a variety of materials, such as cast iron, steel, steel conduits, copper pipe and tubing as well as non-metallic pipes such as PVC, CPVC, ABS, PVDF, PEX, PP pipes and more. Sealants can also be used around various cables/bundles and sheet metal ductwork.

Wrap Strips

The HydroFlame Wrap Strip is made of a high-performance, flexible, intumescent material that forms a protective char when exposed to heat in order to prevent the passage of flames and toxic gases. Use HydroFlame wrap strips with fire rated assemblies, large combustible pipe, insulated pipe penetrations within concrete/masonry walls, concrete and wood floors, and gypsum wall assemblies. They can also be used with a custom collar.

Pipe Collars

HydroFlame Pipe Collars are pre-assembled with highly intumescent material and are ideal for use in open and closed through-penetration firestop systems. Featuring an easy interlocking tab for efficient installation, HydroFlame's unique design helps save time and expense, when compared to other manufacturers' smaller collars. Use HydroFlame Pipe Collars for firestopping larger pipe penetrations. Collars are compatible with concrete floor and wall assemblies, as well as on gypsum wall and rated wood floors.

Putty Pads

HydroFlame Putty Pads are made of a moldable, non-curing, single component fire-rated material. Designed for membrane-penetration firestop systems, HydroFlame's putty expands when exposed to heat to form an insulating char. This protects against the spread of flames, smoke, gas and water through penetration openings. No mixing is required for application, and this product can be used on metal or nonmetallic electrical box outlets and electrical or mechanical cabinets.

Read on to explore HoldRite's all-new assortment of firestop solutions, **developed with your needs in mind**. Our sealants, wrap strips, pipe collars, putty pads and firestop accessories are designed to ensure the highest level of safety and efficiency on your job site.

HoldRite™ HydroFlame™ 50 **Smoke & Acoustic Sealant**

- Easily dispensed using a caulking gun
- Provides a flexible paintable sealant once cured
- Meets LEED criteria
- Low VOC content
- FBC™ system compatible
- Easily cleans up with water
- Clean Air Gold certified
- High STC Rating 69
- 2 Year shelf life

HoldRite™ HydroFlame™ 100 **Firestop Sealant**

- Flexible (Elastomeric)
- Low VOC
- Meets LEED Criteria
- Paintable
- Water based
- Excellent freeze-thaw
- High STC rating 65
- 3 year shelf life
- FBC™ system compatible
- Easily dispensed (caulking gun or trowel)
- G21 testing for obstruction of mold growth
- Clean Air Gold certified
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 Testing Standards

HoldRite™ HydroFlame™ 200 Firestop Sealant

- Flexible (Elastomeric)
- Low VOC
- Meets LEED Criteria
- Paintable
- Water based
- Excellent freeze-thaw
- High performance intumescent
- Clean Air Gold certified
- 3 year shelf life
- FBC™ system compatible
- Easily dispensed (caulking gun or trowel)
- G21 testing for obstruction of mold growth
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 Testing Standards
- High STC Rating of 66

HoldRite™ HydroFlame™ 300 Firestop Sealant

- Flexible $\pm 33\%$ movement
- Low VOC
- Repels Water- excellent for W Ratings or washout conditions
- Excellent freeze-thaw
- 1 year shelf life
- FBC™ system compatible
- Easily dispensed (caulking gun or trowel)
- Antifungal properties
- UL GreenGuard Gold Certified
- Gray color to match concrete floors or walls
- Single component silicone
- UL Listed Firestop Systems
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 Testing Standards

HoldRite™ HydroFlame™ Pipe Collar

- Easy and fast installation
- Labor savings by not having to measure material
- Highly intumescent
- Economical solution for plastic pipes
- FBC™ system compatible
- Approved for PVC, CPVC, FRPP, ABS and PVC/ABS foam core insulations and more
- Clean Air Gold certified
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 Testing Standard

HoldRite™ HydroFlame™ Putty Pads

- Possesses intumescent properties; expands when exposed to fire.
- No volatile solvents, which makes it particularly useful when installing in confined spaces or occupied areas
- Does not have asbestos fillers
- A single component putty system; no mixing necessary and no required additives
- DOT Classification is not regulated
- Applied by hand
- Easy to install
- Adheres to all common building surfaces
- Clean Air Gold certified
- UL listed CLIV
- High STC Rating of 66

HoldRite™ HydroFlame™ Wrap Strips

- No curing time
- Excellent freeze-thaw properties
- Simple to apply
- Systems up to 12" (PVC)
- Flexible
- Forms hardened char after expansion
- Highly intumescent
- Can be installed from the topside of floor eliminating the need for ladders
- FBC™ system compatible
- Clean Air Gold certified
- Can also be installed with a custom collar
- Approved for PVC, CPVC, FRPP, ABS and PVC/ABS foam core insulations and more
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 testing standards

HoldRite™ HydroFlame™ 50 Smoke & Acoustic Sealant

HoldRite™ HydroFlame™ 50 is a smoke and acoustic sealant used to seal around penetrations in non-rated horizontal or vertical construction assemblies. Works in conjunction with and complements HoldRite Silencer series in wall stud noise dampening systems. When properly installed, Hydroflame 50 will prevent the passage of cold smoke through the penetration opening to the other side of the non-rated assembly while also providing an excellent sound barrier by preventing the transfer of airborne sound and other vibrations from passing through to the other side of the assembly.

- Easily dispensed using a caulking gun
- Provides a flexible paintable sealant once cured
- Meets LEED criteria
- Low VOC content
- FBC™ system compatible
- Easily cleans up with water
- Clean Air Gold certified
- High STC rating 69
- 2 year shelf life
- Safe for plastic pipes
- Will not react to bituminous coatings on cast iron pipes

HoldRite™ HydroFlame™ 100 Firestop Sealant

HoldRite™ HydroFlame™ 100 is an elastomeric water-based single component non-sag firestop sealant. It is convenient in areas and conditions where dynamic movement is expected. A perfect firestop sealant for new and existing penetrations through interior rated gypsum, concrete and block walls as well as rated concrete floors, concrete over metal decking floors and wood floor ceiling assemblies. When properly installed, HydroFlame 100 will prevent the passage of smoke, gasses and flames through openings around penetrating items. HydroFlame 100 is ready to be dispensed out of the package and does not require thinning or mixing. It is simple to install and can be dispensed out of any standard caulking gun or bulk loader that is designed for 10-, 20- or 30-ounce packaging. Additionally, It can easily be troweled out of a 5-gallon bucket. HydroFlame 100 UL systems are rated up to 4 hours as tested in conformance to ASTM E814 or UL 1479 and CAN/ULC S115 Testing Standards.

HoldRite™ HydroFlame™ 300 Firestop Sealant

HoldRite™ HydroFlame™ Silicone Sealants help protect vertical and horizontal construction assemblies from the spread of flames, smoke and hot gases. Additionally, the 300 series firestop sealants repel water in washout conditions or in through penetrations where moisture is a concern, such as bathrooms, water heater closets and kitchens. The HydroFlame 300CG Firestop Sealant is caulk-grade and can be installed in floor or wall applications and the HydroFlame 300SL Firestop Sealant is self-leveling and can be installed in floor applications.

- Repels Water - excellent for W ratings or washout conditions

HoldRite™ HydroFlame™ Pipe Collar

HoldRite™ HydroFlame™ Pipe Collars are prefabricated for open and closed through-penetration firestop systems using 1-1/2" (38 mm) to 6" (152 mm) plastic pipe. An easy interlocking tab assures fast and easy installation. The design of the collar greatly reduces the time and expense that is required to install competitive collars. Tested in accordance to ASTM E814 or UL 1479 and CAN/ULC-S115 testing standards.

- No curing time
- Easy and fast installation
- Labor savings by not having to measure material

HoldRite™ HydroFlame™ Putty Pads

HoldRite™ HydroFlame™ moldable putty pads are a non-curing single component fire-rated material for membrane-penetration firestop systems. HydroFlame putty will intumesce and expand when exposed to heat, forming an insulating char. In the event of a fire, putty pads will prevent the spread of flames, smoke and gas through penetration openings. Putty pads are applied by hand and mixing is never required. HydroFlame Putty Pads are rated for up to 3 hours as tested in accordance to ASTM E814, UL 1479, and CAN/ULC S115 testing standards. HydroFlame putty pads are designed to be used in conjunction with metallic or non-metallic electrical box outlets.

- Possesses intumescent properties; expands when exposed to fire
- No volatile solvents, which makes it particularly useful when installing in confined spaces or occupied areas
- Does not have asbestos fillers

HoldRite™ HydroFlame™ Wrap Strips

The HoldRite™ HydroFlame™ Wrap Strip is a high-performance highly intumescent flexible wrap strip that is designed to expand when exposed to heat. Wrap strips are intended to be used around combustible pipes and insulated pipes as a solution to seal off these challenging pipes in the event of a fire. When the wrap strip activates and intumesces due to heat, it will form a robust char that will seal off the opening around the penetrating items or will close off completely the annular space that is exposed once combustible pipes melt away. This prevents the passage of hot gases and flames to migrate to the other side of a fire-rated assembly. Tested in accordance to ASTM E814, UL 1479 and CAN/ULC S115 testing standards.

- No curing time
- Excellent freeze-thaw properties
- Simple to apply
- Systems up to 12" (PVC)
- Flexible
- Forms hardened char after expansion
- Highly intumescent
- Can be installed from the topside of floor eliminating the need for ladders, refer to specific UL details
- FBC™ System Compatible
- Clean Air Gold certified
- Can also be used with custom collar

Transforming Firestop Solutions with HoldRite™ HydroFlame™ Pro Series

The evolution of a lab-tested and UL Listed cast-in-place firestop solution continues with the introduction of the HoldRite™ HydroFlame™ Pro Series. Finally, an easy to specify, stock, order and install firestop solution is available on wholesale distributors' shelves throughout North America. Finished are the decades of frustration, significant pre-planning requirements, complex purchase orders, tight delivery deadlines and job site fabrication challenges.

The HoldRite team is proud to manufacture the HydroFlame Pro Series in the USA and to ensure it meets and exceeds building code requirements, protects the project against the dangers of fire, gas and smoke spread, safeguards property from water damage and mold, and eliminates field-devised installation methods from building projects.

Available now for purchase at your wholesale distributor of choice.

Cast-in-place Firestop Sleeve Product Configuration

No assembly required

Transforming Firestop Solutions

Telescoping Sleeves

- Eliminate the need to cut sleeves on most job sites

Locator Whiskers

- Locate buried sleeves after concrete pour

Safety Cap

- OSHA-compliant hole cover
- Helps keep job site and installers safe

For Wood or Metal Form Decks

- Telescoping or adjustable cap design

Firestop a Wide Variety of Pipe Type & Sizes

- Material type and pipe sizes easily identifiable (1/2" to 6")

Superior Seal

- UL W rated (Refer to UL System data for sizing requirements)

Interlocking Nail-in Base

- Ideal for alignment layout and tight install locations

Numerous Accessories Available

- Telescoping extension, water module, water dam, aerator adaptor box and safety cap tool

Faster Install

- Up to 6 times faster to install than makeshift methods

Easy to Stock

- Available in stock at your local wholesale distributor

UL Listed Firestop Device

- Meets and exceeds building code requirements

Patented and Patent Pending.

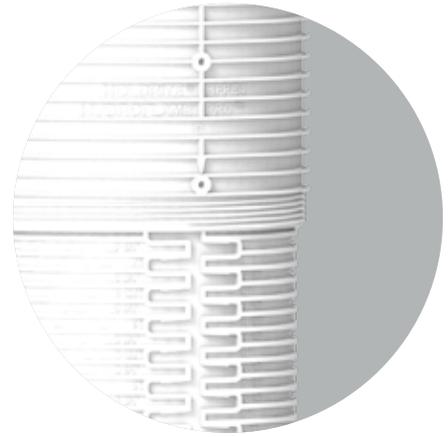

FBC™ System Compatible indicates that this products has been tested, and is monitored on an ongoing basis, to assure its chemical compatibility with FlowGuard Gold™, BlazeMaster™ and Corzan™ piping systems and products made with TempRite™ Technology.

The FBC Compatible Logo, FBC™, FlowGuard Gold™, BlazeMaster™, Corzan™, and TempRite™ are trademarks of Lubrizol Advanced Materials Inc. or its affiliates.

HoldRite™ HydroFlame™ Pro Series Interlocking Telescoping Sleeve Design

- Eliminate the need to cut sleeves on the jobsite
- Adjust sleeve to desired height 2 ½" to 11 ¾"
- Extension sleeves available for greater than 11 ¾"
- Accommodates various pipe, conduit and cable types and sizes ½" to 6"
- Firestop sleeve with adjustable cap design also available at 7 ¼" to 8" tall
- Faster install over traditional methods or other manufactured designs
- Measurement guide system built into sleeves (US and Metric)
- Significantly reduces the number of SKU's required to stock shelves or complete job

HoldRite™ HydroFlame™ Pro Series Locator Whiskers

- Easily locate buried sleeves after concrete pour
- Quickly identify plastic pipe (red whiskers) or metal pipe (black whiskers) sleeve penetrations
- Green whiskers also available to identify electrical penetrations

HoldRite™ HydroFlame™ Pro Series Safety Cap

- Adjustable cap can be removed by using hammer or screwdriver
- Both caps meet OSHA hole cover safety requirements
- Adjustable cap provides sleeve heights from 7 ¼" to 8" in ¼" increments

Telescoping Sleeve Cap
and Safety Cap Tool

Adjustable Cap
(Knock Out)

HoldRite™ HydroFlame™ Pro Series Interlocking Nail-in Base

- Ideal for alignment layout and tight install locations
- Fast and easy installation
- Quickly identify plastic pipe or metal pipe (red base) or metal pipe (black base) sleeve penetrations

Reduce Installation Costs with the HoldRite™ HydroFlame™ Pro Series

Application Cost Savings Analysis Example Install sleeve and firestop for a 2" pipe through an 8" thick concrete slab on a wood form deck.

Inefficient Plastic Concrete Sleeve Solution		
Installation Steps	Approx. Mat. Cost	Labor Time
1. Select 4" sleeve, measure and mark for saw cutting	\$3.00	1 minute
2. Cut sleeve, in prep for re-assembly to slab height of 8"		1 minute
3. Build sleeve to height with screw gun, screws and tape	50¢	3 minutes
4. Nail sleeve to form deck (concrete poured by others)		2 minutes
5. Remove/demolish sleeve out of hole		5 minutes
6. Buy material, cut, build and install hole cover (OSHA)	\$1.00	2 minutes
7. Clean-up sleeve debris on floor below		1 minute
8. Remove hole cover. Install pipe with riser clamp		2 minutes
9. Collect, store and re-distribute hole cover up stairs		1 minute
10. Remove riser clamp for access to annular space		1 minute
11. Install and compact mineral wool material into annular space	50¢	2 minutes
12. Install fire caulk to proper thickness and trowel level	\$1.00	2 minutes
13. Re-install riser clamp (and hope pipe didn't settle)		1 minute
14. Clean debris, hands and tools and caulking tube and store for re-use		2 minutes
Totals:		
Approximate Material Costs	\$6.00	
Time		26 minutes
Labor Cost at \$50/hour	\$21.67	
Total Installed Cost (T&M)	\$27.67	

HoldRite HydroFlame Pro Series		
Installation Steps	Approx. Mat. Cost	Labor Time
1. Select sleeve size and nail it to form deck (concrete poured by others)	\$9.00	2 minutes
2. Remove cap and install pipe with riser clamp		2 minutes
Totals:		
Approximate Material Costs	\$9.00	
Time		4 minutes
Labor Cost at \$50/hour	\$3.33	
Total Installed Cost (T&M)	\$12.33	

Save **\$15.34** per installation over the problematic inefficient method.

HoldRite™ HydroFlame™ Pro Series

Firestop Sleeve Advantages vs. Commonly Observed Cast-in-place Devices

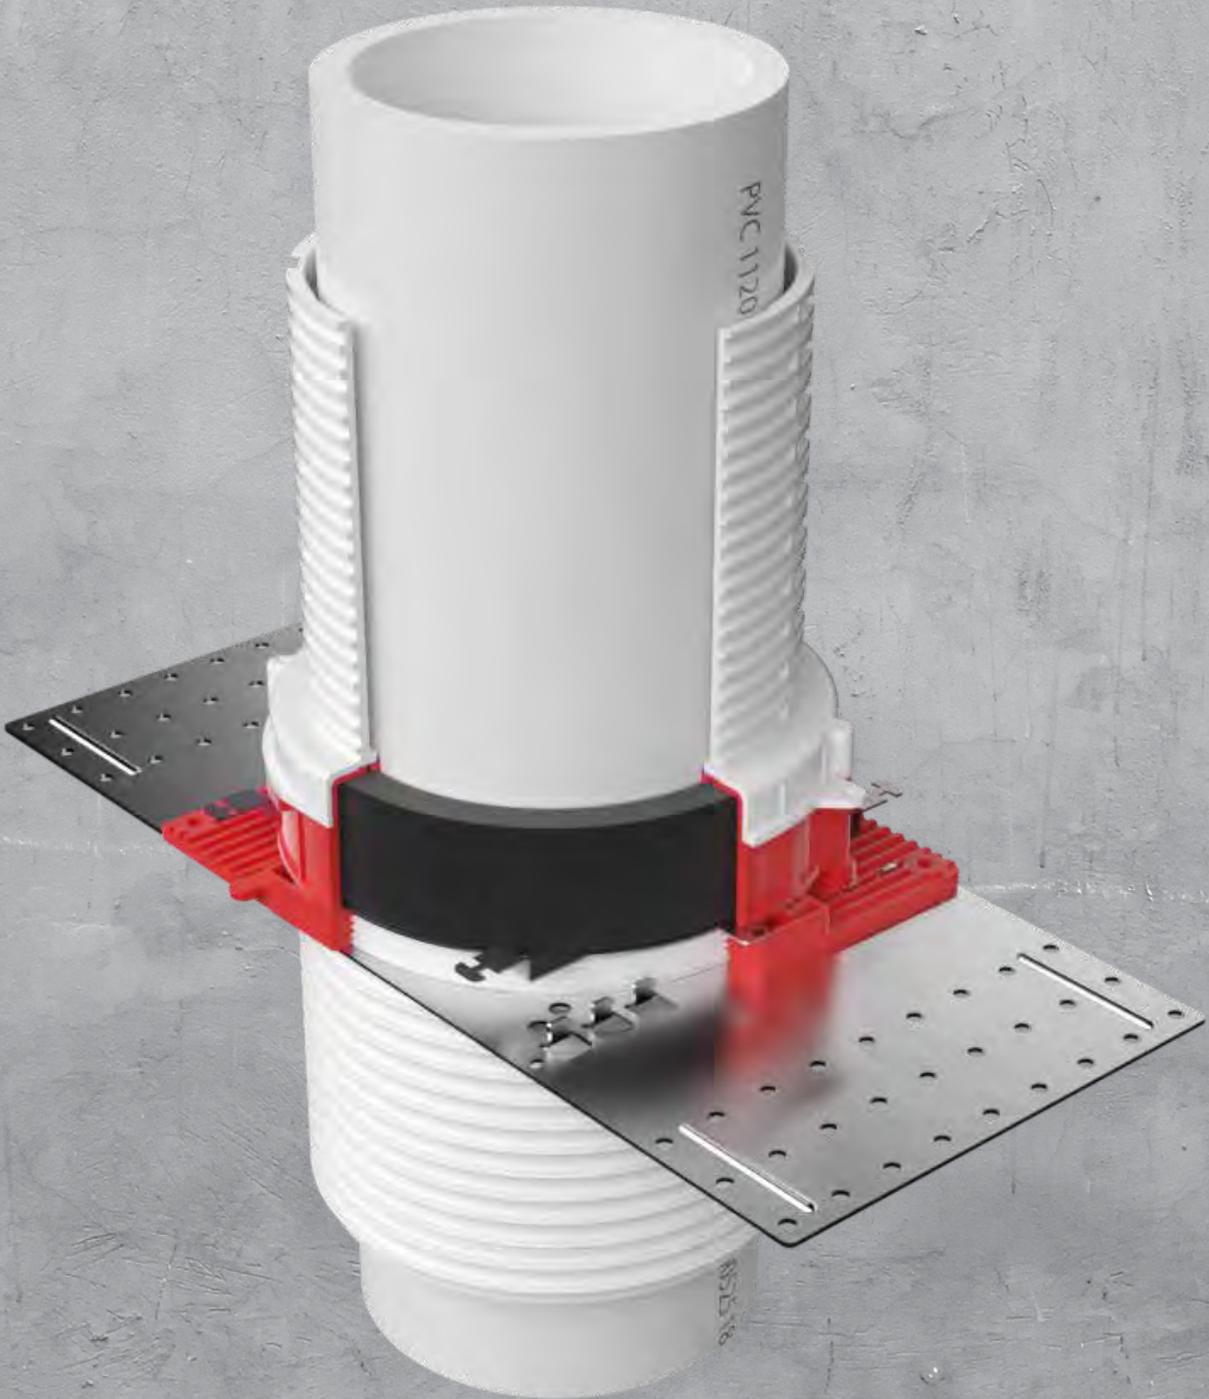

HoldRite™ HydroFlame™ Pro Series	Features and Benefits	Commonly Observed Cast-in-place Sleeves
✓	Adjustable height sleeves	✗
✓	Fast install	✗
✓	UL W-Rated watertight mid-body seal (Refer to UL System data for specific sizing requirements)	✗
✓	Locator whiskers to locate sleeves after pour	✗
✓	Safety caps are easy to remove without demolition	✗
✓	Aerator adapter available in 2", 3", 4", 5" and 6" varieties	✗
✓	Available exclusively through wholesale distribution	✗
✓	Most stable metal deck kit and requires just one accessory	✗
✓	UL fire rated for 1/2"-6" pipes and conduits without any accessories	✗
✓	Hollow sleeve versions available if caulking is preferred	✗
✓	Made in the USA	✗
✓	Most stable sleeve height extensions on the market	✗
✓	Excellent shower & floor drain, tub box and toilet sleeve kits	✗
✓	Height markings & straight lines aid in cutting sleeves short	✗

HoldRite™ HydroFlame™ Pro Series Telescoping Firestop Sleeves

- Ideal for flat concrete form decks – cast-in-place
- Ideal for corrugated metal decks (corrugated deck plate required)
- Available for ½" to 6" penetrants – piping, conduit, cables, etc.
- For insulated and non-insulated pipes
- Telescoping design adjusts from 7½" to 11¾", in ¼" increments
- Cut to as short as 2½"
- Black base and black whiskers identifies metal piping system
- Red base and red whiskers identifies plastic or metal piping system
- Includes locator whiskers, to locate buried sleeves and to identify pipe type (metal or plastic)
- Dimensions on sleeves allows for simple height adjustments
- Safety caps meet OSHA hole cover requirements
- Refer to UL System data for specific sizing requirements
- Meets and/or exceeds building code requirements
- Built in fire, smoke, gas and water protection
- UL W-Rated seal, water-tight for most penetrants (Refer to UL System data for specific sizing requirements)
- Allows for contraction, expansion, movement and off-center pipes
- Reduces piping system noise transfer by maintaining annular spacing
- Interlocking base capability assists with layout alignment
- Extensions available for slabs over 11¾" thick
- A variety of accessories are available
- UL 50 Pa Ratings
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 testing standards

1 Cut inner and outer sleeve if desired height is less than 8"

2 Lock outer sleeve in place

3 Re-install cap & insert whiskers

4 Nail to form deck

5 Remove cap with Safety Cap Tool or break out with hammer

6 Install pipe

HoldRite™ HydroFlame™ Pro Series Firestop Sleeves with Adjustable Cap

- Ideal for flat concrete form decks – cast-in-place
- Ideal for corrugated metal decks (corrugated deck plate required)
- Available for ½" to 6" penetrants, piping, conduits, cables, etc.
- For insulated and non-insulated pipes
- The firestop sleeve with adjustable cap is 7¼" to 8" tall in ¼" increments
- The sleeve is set at 8" tall in the factory
- Black base and black whiskers identifies metal piping system
- Red base and red whiskers identifies plastic or metal piping system
- Includes locator whiskers, to locate buried sleeves and to identify pipe type (metal or plastic)
- Dimensions on sleeve allows for simple height adjustment when cutting
- Safety caps meet OSHA hole cover requirements
- UL Listed firestop devices (2 or 3 hour F-ratings)
- Meets and/or exceeds building code requirements
- Built in fire, smoke, gas and water protection
- UL W-Rated seal, water-tight for most penetrants (Refer to UL System data for specific sizing requirements)
- Allows for contraction, expansion, movement and off-center pipes
- Reduces piping system noise transfer by maintaining annular spacing
- Interlocking base capability assists with layout alignment
- A variety of accessories are available
- UL 50 Pa Ratings
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 testing standards
- Field modifications can be made down to 3-1/2 inches

HoldRite™ HydroFlame™ Pro Series Telescoping Hollow Sleeves

(Sleeve only, no firestopping materials included)

- UL Listed sleeves, when installed per UL Systems
- No intumescent material included. Can achieve a 2 or 3 hour F rating by adding in mineral wool and HydroFlame firestop sealants. See UL listing for further details
- Telescoping design adjusts from 7½" to 11¾", in ¼" increments
- Cut to as short as 4½"
- Available for ½" to 6" penetrants – piping, etc.
- For insulated and non-insulated pipes
- Fast, simple concrete sleeve for flat form decks
- Includes locator whiskers, to locate buried sleeves
- Dimensions on sleeve allows for simple height adjustment when cutting
- Safety caps meet OSHA hole cover requirements
- No field assembly required
- Sleeve remains in slab, unlike typical hollow sleeves
- Accepts HoldRite HydroFlame Pro Series Corrugated Metal Deck Plate, for corrugated deck forms
- Extensions are available for slabs over 11¾" thick
- A variety of accessories are available
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 testing standards

1

Adjustable Cap

2

Insert whiskers

3

Nail to form deck

4

Pour concrete

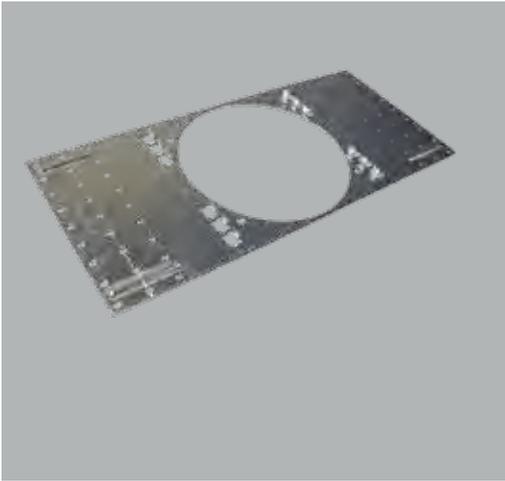

5

Knock out safety cap with hammer or screwdriver

6

Install pipe

HoldRite™ HydroFlame™ Pro Series Corrugated Metal Deck Plates

- For use with concrete pours over corrugated metal decks
- Assembles directly to HoldRite HydroFlame Pro Series Firestop Sleeves
- Sizes available for 1", 2", 3", 4", 5", and 6" sleeves
- Superior strength and stability
- One-piece metal deck solution

(*Must be ordered with HydroFlame Pro Series Sleeves)

Model Number	Penetrating Pipe Type	Used With	Nominal Penetrant Size	Box Qty
HFPCD1	Plastic and Metal	HFP-P/M1, HFP-P/M1B, HFP-H2, HFP-H2B	1/4" - 1 1/4"	10

HFPCD6-DC	Plastic and Metal	HFP-P/M6, HFP-P/M6B, HFP-H7, HFP-H7B	4" - 6"	2

Note: Use of a CD Plate must be accompanied with use of an outer sleeve or sleeve extension, as shown in installation step #3 below.

1

Cut inner and outer sleeve if desired height is under 8"

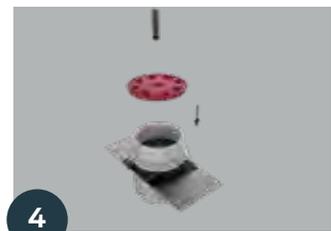

2

Install CD Plate

3

Install inverted outer sleeve to bottom of base

4

Re-install cap & insert whiskers

5

Install HoldRite HydroFlame Pro sleeve assembly into corrugated deck

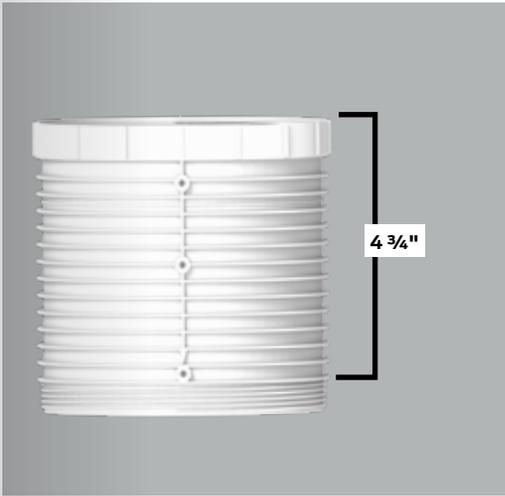

6

Remove cap with Safety Cap Tool or break out with hammer

7

Install pipe

HoldRite™ HydroFlame™ Pro Series Extension Sleeves

- Extends the height of HoldRite HydroFlame Pro Series sleeves by as much as 4³/₄ in 1/4" increments
- No coupling needed for connection to sleeves
- Ideal for use on concrete pours over 11³/₄"
- Available for all HoldRite HydroFlame Pro Series sleeve sizes
- Connects to safety caps, water dams, water modules and underside of sleeves

Sleeve Extensions for Telescoping Firestop and Hollow Sleeves

Model Number	Fits Firestop Sleeves	Fits Hollow Sleeves	Nominal Penetrant Size	Box Qty
HFPE1	#1 Firestop Sleeves	#2 Hollow Sleeves	1/4" - 1 1/4"	5
HFPE2	#2 Firestop Sleeves	#3 Hollow Sleeves	1" - 2"	10

HFPE5	#5 Firestop Sleeves	#6 Hollow Sleeves	3" - 5"	2
HFPE6	#6 Firestop Sleeves	#7 Hollow Sleeves	4" - 6"	2

Sleeve Extensions for Firestop and Hollow Sleeves with Adjustable Cap (Includes Safety Cap)

Model Number	Fits Firestop Sleeves	Fits Hollow Sleeves	Nominal Penetrant Size	Box Qty
HFPE1	#1 Firestop Sleeves	#2 Hollow Sleeves	1/4" - 1 1/4"	5
HFPE2	#2 Firestop Sleeves	#3 Hollow Sleeves	1" - 2"	10
HFPE3	#3 Firestop Sleeves	#4 Hollow Sleeves	1 1/4" - 3"	10
HFPE4	#4 Firestop Sleeves	#5 Hollow Sleeves	2 1/2" - 4"	10
HFPE5	#5 Firestop Sleeves	#6 Hollow Sleeves	3" - 5"	2
HFPE6	#6 Firestop Sleeves	#7 Hollow Sleeves	4" - 6"	2

HoldRite™ HydroFlame™ Pro Series Water Module

- Provides added water protection for HoldRite HydroFlame Pro Series Sleeves
- Prevents debris from falling into annular space around piping
- Pre-installed prior to concrete pour
- Available for all HoldRite HydroFlame Pro Series Sleeve sizes
- Adds 1/2" to the overall height of pro series sleeves
- Accepts safety cap and other HoldRite HydroFlame Pro Series accessories
- UL W-Rated seal, water-tight for most penetrants

Type	UL Rating	Status
Water	W*	✓

Model Number	Fits Firestop Sleeves	Fits Hollow Sleeves	Nominal Penetrant Size	Box Qty
HFPWM1	#1 Firestop Sleeves	#2 Hollow Sleeves	1/2" - 1"	5
HFPWM2	#2 Firestop Sleeves	#3 Hollow Sleeves	1 1/4" - 2"	5

HFPWM4	#4 Firestop Sleeves	#5 Hollow Sleeves	3" - 4"	5
HFPWM6	#6 Firestop Sleeves	#7 Hollow Sleeves	5" - 6"	5

Note: Use of a water module is fully optional and not required to obtain a W rating. The mid-body seal in standard HydroFlame Pro Series sleeves already provides a UL W rating (refer to UL System data for specific sizing requirements).

1

Cut inner and outer sleeve if desired height is under 8"

2

Lock outer sleeve in place

3

Remove cap

4

Install water module assembly

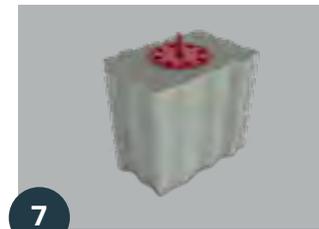

5

Re-install cap & insert whiskers

6

Install to form deck

7

Pour concrete to top of sleeve

HoldRite™ HydroFlame™ Pro Series Water Dams

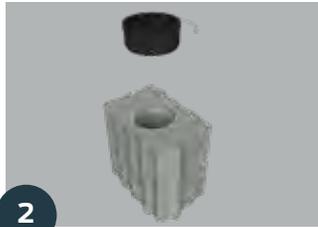

- Adds 2" of overall height to the HoldRite HydroFlame Pro Series Sleeve
- Load-rated for riser clamp support – see product spec sheet
- Installed after concrete pour and safety cap removal
- Impedes water when used with cast-in-place sleeves
- Screws onto HoldRite HydroFlame Pro Series telescoping sleeves or water modules

Model Number	Fits Firestop Sleeves	Fits Hollow Sleeves	Nominal Penetrant Size	Box Qty
HFPWD1	#1 Firestop Sleeves	#2 Hollow Sleeves	1/4" - 1 1/4"	5

HFPWD5	#5 Firestop Sleeves	#6 Hollow Sleeves	4" - 5"	5
HFPWD6	#6 Firestop Sleeves	#7 Hollow Sleeves	4" - 6"	5

1

Remove cap with Safety Cap Tool or break out with hammer

2

Install 2" Water Dam. Add threaded sealant if desired

3

Install pipe

HoldRite™ HydroFlame™ Pro Series Tub Boxes

- UL Listed firestop device for bathtub drains
- 3 hour F-Rating
- Built-in fire, smoke and gas protection
- Provides a water tight slab penetration
- Accepts 1½" PVC, ABS, cast iron, copper, and brass drain pipes using appropriate seal plug (provided with TW models)
- Allows for expansion, contraction and movement
- UL W rated water seal (Refer to UL System data for specific sizing requirements)
- Height can be modified in the field
- Tub Boxes built in pre set heights of 8, 9, and 10 inches tall
- Tub box accepts 2 or 3 inch sleeves. 3 inch sleeve allows for off center layouts and provides maximum clearance during drain installation
- Tub box has two knock-out locations to accommodate standard and exotic tub drain and overflow configurations

HFPTB-1.5NP	Plastic and Metal	1½" IPS	10

1

Attach sleeve to Tub Box

2

Install rear legs (cut to height)

3

Nail tub box to form deck

4

Pour concrete to top of tub box

5

Remove styrofoam & "knock out plug"

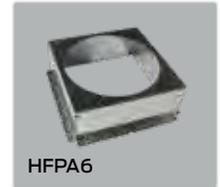

6

Slide rubber donut onto drain pipe & insert assembly through hole (Donut only required on "TW" model)

HoldRite™ HydroFlame™ Pro Series Aerator Adapter

- Provides a recess in the underside of the concrete floor, for fitting access
- Available for use with 2", 3", 4" 5" & 6" HoldRite HydroFlame Pro Series Sleeve
- For use in concrete floors as thin as 5½"
- Ideal for solvent and other high and tight fitting joint access

Model Number	Fits Firestop Sleeves	Fits Hollow Sleeves	Nominal Penetrant Size	Height	Box Qty	Prox. Footprint

1

Remove cap with Safety Cap Tool or break out with hammer

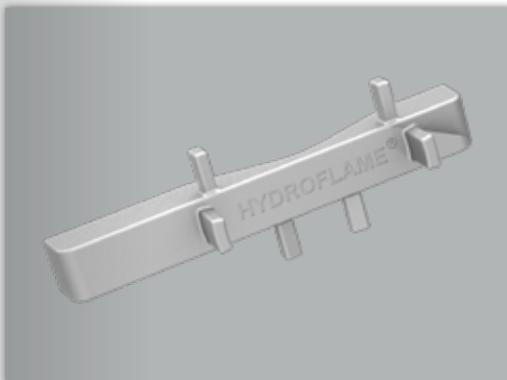

2

Insert plastic or cast iron Closet Flange and pipe

3

Attach Closet Flange to floor

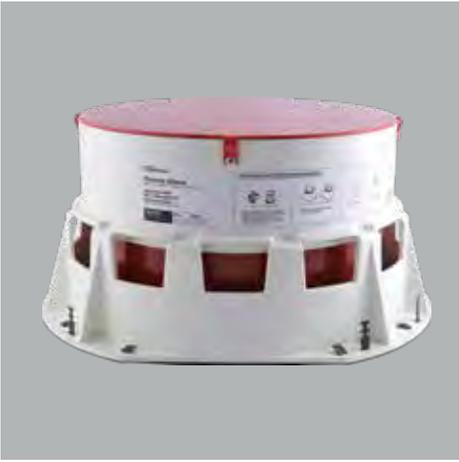

HoldRite™ HydroFlame™ Pro Series Safety Cap Tool

- Easy to use forged steel, nickel plated, hand tool
- For removal of HoldRite HydroFlame Pro Series Safety Caps
- Multi-purpose wrench works with all sizes of the HoldRite HydroFlame Pro Series Safety Caps
- Use manually, or strike with a hammer

Model Number	Qty
HFPT For removal of all size safety caps (1" - 6")	1

HoldRite™ HydroFlame™ Large Diameter Firestopping Sleeves

- Ideal for metallic, plastic and insulated pipes ranging from 8" - 12"
- For use with slabs 6" or thicker
- Provides 3 hour fire rating for slabs thicker than 6"
- Includes an OSHA-compliant hole cover plate/safety cap
- 1" extensions available for thicker floor slabs
- W-rating achievable with silicone caulking
- Standard sleeve height is 8" tall and field modifications can be made down to 6" tall
- Provides 3 hour T ratings for plastic pipe penetrants

Model Number	Penetrating Pipe Type	Nominal Penetrant Size	Box Qty
HF-P8	Plastic and Metal	8" CTS - 8" IPS	1
HF-P10	Plastic and Metal	10" CTS - 10" IPS	1
HF-P12	Plastic and Metal	12" CTS - 12" IPS	1
HF-M8	Metal	8" CTS - 8" IPS	1
HF-M10	Metal	10" CTS - 10" IPS	1
HF-M12	Metal	12" CTS - 12" IPS	1

HoldRite™ HydroFlame™ Large Diameter Hollow Sleeves

- Ideal for metallic, plastic and insulated pipes ranging from 8" - 12"
- For use with slabs 6" or thicker
- Includes an OSHA-compliant hole cover plate/safety cap
- 1" extensions available for thicker floor slabs
- W-rating achievable with silicone caulking
- Firestopping for metallic and insulated metallic piping achieved by using mineral wool and HydroFlame Firestop Sealants

Model Number	Penetrating Pipe Type	Nominal Penetrant Size	Box Qty
HF-H10	Metal	6" CTS - 8" IPS	1
HF-H12	Metal	8" CTS - 10" IPS	1
HF-H14	Metal	10" CTS - 12" IPS	1

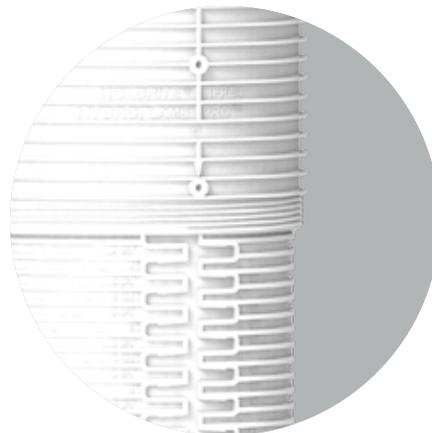

HoldRite™ HydroFlame™ Large Diameter Extensions

- Provides height extensions in 1" increments
- Two extensions can be combined to form a water dam
- Includes built in Riser Clamp Bearing Plate

Model Number	Fits Firestop Sleeves	Fits Hollow Sleeves	Nominal Penetrant Size	Box Qty
HFEXT81	#8 Firestop Sleeve	#10 Hollow Sleeve	6" CTS - 8" IPS	2
HFEXT101	#10 Firestop Sleeve	#12 Hollow Sleeve	8" CTS - 10" IPS	2
HFEXT121	#12 Firestop Sleeve	#14 Hollow Sleeve	10" CTS - 12" IPS	2

HoldRite™ HydroFlame™ Pro Series Telescoping Electrical Firestop Sleeves

- Eliminate the need to cut sleeves on the jobsite
- Adjust sleeve to desired height 2 ½" to 11 ¾"
- Extension sleeves available for greater than 11 ¾"
- Accommodates various pipe, conduit and cable types and sizes ½" to 6"
- Firestop sleeve with adjustable cap design also available at 7 ¼" to 8" tall
- Faster install over traditional methods or other manufactured designs
- Measurement guide system built into sleeves (US and Metric)
- Significantly reduces the number of SKU's required to stock shelves or complete job
- Green base color makes electrical penetrations easy to identify from other trade penetrations

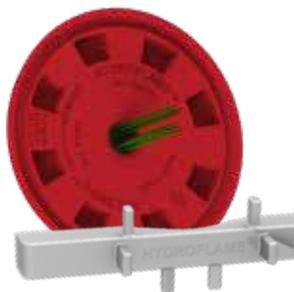

HoldRite™ HydroFlame™ Pro Series Locator Whiskers

- Easily locate buried sleeves after concrete pour
- Green whiskers also available to identify electrical penetrations
- Comes standard with green whiskers to quickly identify and find electrical pipe and cable penetrations

HoldRite™ HydroFlame™ Pro Series Safety Cap

- Adjustable cap can be removed by using hammer or screwdriver
- Both caps meet OSHA hole cover safety requirements
- Adjustable cap provides sleeve heights from 7 ¼" to 8" in ¼" increments

Telescoping Sleeve Cap
and Safety Cap Tool

Adjustable Cap
(Knock Out)

HoldRite™ HydroFlame™ Pro Series Interlocking Nail-in Base

- Ideal for alignment layout and tight install locations
- Fast and easy installation
- Quickly identify plastic or metal conduits, cables and cable bundles penetrations (green colored base)

HoldRite™ HydroFlame™ Pro Series Telescoping Electrical Firestop Sleeves

- Ideal for flat concrete form decks – cast-in-place
- Ideal for corrugated metal decks (corrugated deck plate required)
- Available for 1/2" to 6" penetrants – conduit, cables, etc.
- For plastic/metal conduits, cables, and cable bundles
- Telescoping design adjusts from 7 1/2" to 11 3/4", in 1/4" increments
- Cut to as short as 2 1/2"
- Green base and green locator whiskers easily identifies electrical trade penetrations from other on-site trade penetrations
- Dimensions on sleeves allows for simple height adjustments
- Safety caps meet OSHA hole cover requirements
- Refer to UL System data for specific sizing requirements
- Meets and/or exceeds building code requirements
- Built in fire, smoke, gas and water protection
- UL W-Rated seal, water-tight for most penetrants (Refer to UL System data for specific sizing requirements)
- Allows for contraction, expansion, movement and off-center penetrants
- Reduces piping system noise transfer by maintaining annular spacing
- Interlocking base capability assists with layout alignment
- Extensions available for slabs over 11 3/4" thick
- A variety of accessories are available
- UL 50 Pa Ratings
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 testing standards

Type	UL Rating	Status
Water	W**	✓
Smoke / Gas	L	✓
Fire	F	✓
Thermal	T*	✓

HFP-G6	plastic/metal conduits and cables/cable bundles	5" - 6"	2

1

Cut inner and outer sleeve if desired height is less than 8"

2

Lock outer sleeve in place

3

Re-install cap & insert whiskers

4

Nail to form deck

5

Remove cap with Safety Cap Tool or break out with hammer

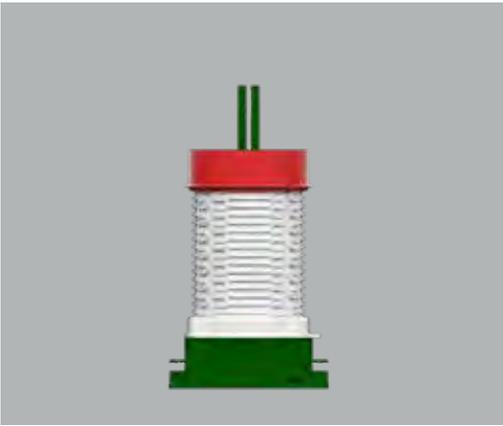

6

Install pipe

7

Insert Cable(s)

HoldRite™ HydroFlame™ Pro Series Electrical Firestop Sleeve with Adjustable Cap

- Ideal for flat concrete form decks – cast-in-place
- Ideal for corrugated metal decks (corrugated deck plate required)
- Available for ½" to 6" penetrants, piping, conduits, cables, etc.
- For plastic/metal conduits, cables, and cable bundles
- The firestop sleeve with adjustable cap is 7¼" to 8" tall in ¼" increments
- The sleeve is set at 8" tall in the factory
- Green base and green locator whiskers easily identifies electrical trade penetrations from other on-site trade penetrations
- Dimensions on sleeve allows for simple height adjustment when cutting
- Safety caps meet OSHA hole cover requirements
- UL Listed firestop devices (2 or 3 hour F-ratings)
- Meets and/or exceeds building code requirements
- Built in fire, smoke, gas and water protection
- UL W-Rated seal, water-tight for most penetrants (Refer to UL System data for specific sizing requirements)
- Allows for contraction, expansion, movement and off-center pipes
- Reduces piping system noise transfer by maintaining annular spacing
- Interlocking base capability assists with layout alignment
- A variety of accessories are available
- UL 50 Pa Ratings
- Tested to ASTM E814, UL 1479, and CAN/ULC S115 testing standards
- Field modifications can be made down to 3-1/2 inches

HoldRite™ is proud to be an ASPE affiliate sponsor and CEU provider

HoldRite now offers the opportunity for plumbing engineers and designers to earn continuing education units (CEUs) for participation in our ASPE approved educational programs. Topics include plumbing acoustical isolation, pipe hangers and supports, and firestop systems. The CEUs can be earned by scheduling a Lunch and Learn at your business location or by attending one of our scheduled webinars.

Access HoldRite's Comprehensive Building Information Modeling (BIM) Library

Attention, contractors and engineers, in collaboration with Thomas For Industry, we've updated our Building Information Modeling (BIM) Library. HoldRite is a brand professionals trust for quality, reliability and performance. Providing the best digital experience has become one of the most important ways to support our customers. As our customers accelerate adoption of BIM (Building Information Modeling) for commercial building projects, getting the RIGHT data in the RIGHT format like Revit, Bentley or CADmep becomes ever more important.

The updated HoldRite BIM Online catalog provides a wide variety of CAD and BIM formats to select from – over 25 unique formats all ready for immediate download directly into your project file.

Download our BIM Library at bim.holdrite.com

FBC™ System Compatible indicates that this products has been tested, and is monitored on an ongoing basis, to assure its chemical compatibility with FlowGuard Gold™, BlazeMaster™ and Corzan™ piping systems and products made with TempRite™ Technology.

HydroFlame

Firestop Sleeve

Model #HF-PB
Non-Telescoping 8"
Pipe Type: Plastic/Metal

Pipe Size	Min:	Max:
8" CTS	8" IPS	

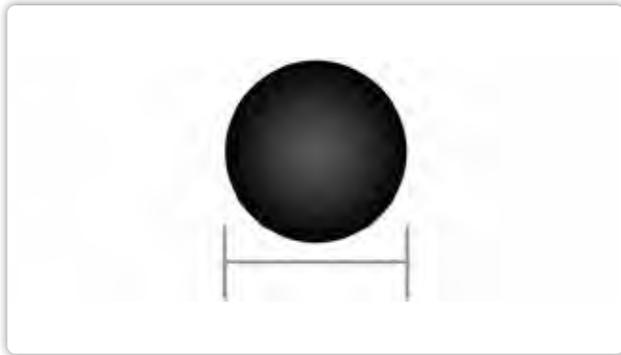

Instructions for Flat Form Deck Installation

1. Remove the cap and use the provided template to mark the location of the sleeve on the deck. The sleeve should be installed in a straight line and should be installed in a straight line.
2. Drill a hole in the deck at the marked location. The hole should be 8" in diameter.
