

GUARDIAN™ BENDER

GUARDIAN™ BENDER

The Guardian™ Bender by IDEAL® brings ease and consistency to conduit bending whether you are a seasoned professional or just getting started. With upgrades across the entire tool, the Guardian Bender will quickly become your go-to bender to get the job done right and done quickly.

Ductile iron head for exceptional durability and rugged construction that withstands a lifetime of heavy use.

Textured blue handle resists corrosion, provides additional grip, and enhances visibility with no threads or flare. Handle is fixed to the head eliminating the need to tighten the handle. With the flare end removed, each handle is sized for the conduit you are bending while giving you the ability to use the handle as a straight edge to measure your next bend.

The preset angle stopper takes the variability out of bending. Each angle location is machined in for accuracy and provides a firm stopping point when completing bends. The bender provides someone of any skill level the tool they need to create the perfect bend, every time.

Head Upgrades:

- Quick adjustment angle stopper
- Non-removable with onboard storage location
- Recessed marking for increased legibility
- In air bend angle indicators on back of head
- Bend correction hole incorporated into head

Handle Upgrades:

- Straight handle - for use as a straight edge
- Textured handle for increased grip
- Handle diameter sized to fit conduit being bent
- BILT® link incorporated onto the handle

Angle Stopper

Push-button, spring-loaded lock to set position for 10°, 22.5°, 30°, 45°, 60° and 90° bends.

Ordering Information

Size	Part No.
1/2"	74-056
3/4"	74-057

Tap. Zoom. Rotate.

Scan for easy 3D interactive instructions on the BILT app for faster completion.

- 3D instructions and explanation.
- Real examples showing steps and calculations.
- Free app to download and use.
- QR Code will be incorporated into bender labels on each product.
