Product ID:	1SAM250000R1015	000
EAN:	4013614405679	
Catalog Description:	MS116-32 Manual Motor Starter	
Long Description:	The MS116-32 manual motor starter is a compact 45 mm width devices with a rated operational current of le = 32.0 A. This device is used to manually switch on and off motors and to protect them reliably and without the need for a fuse from short-circuits, overload and phase failures. The manual motor starter offers a rated service short-circuit breaking capacity lcs = 10 kA at 400 VAC and the trip class 10A. Further features are the build-in disconnect	
	function, temperature compensation, trip- free mechanism and a rotary handle with a clear switch position indication. The manual motor starter is suitable for three- and single-phase applications. Auxiliary contacts, signalling contacts, undervoltage releases, shunt trips, 3-phase bus bars, power in-feed blocks and locking devices for protection against unauthorized changes are available as accessory.
