

RC-1000WHZB

Wireless Omnistat2 Conventional & Heat Pump Thermostat, White.

Omnistat2 thermostats are the latest generation of programmable communicating thermostats and provide precise digital temperature control over your HVAC system. The Omnistat2 can be used standalone or connected to a Leviton automation system. Connect to the Lumina Gateway, part number 74A00-1, to form a wireless energy management system with remote access. Or connect to the Omni series of integrated security and automation systems for a comprehensive management system. Control your thermostat through a Console or Keypad, OmniTouch family Touchscreens, telephones (with voice response) and over the Internet using software from Leviton. The scroll wheel adjusts temperature quickly. The proximity/motion detector lights the screen up to one of 100 different colors when it's approached. The Omnistat2 can display outdoor temperature, humidity and HVAC usage/energy consumption by week. Set back the equipment when the property is not occupied and save on energy costs. The built-in vacation mode automatically restores temperatures.

UPC Code : 872257008104

Country Of Origin : Please Contact Customer Service.

Features and Benefits

- Utilize standalone or attach to either Lumina Gateway wireless eco-system or comprehensive Omni automation systems.
- Single Stage including gas, oil, steam, hydronic, forced air, radiant, and electric
- Utilizes Leviton Lumina RF mesh networking for wireless communication
- Program a different option for everyday of the week
- Leviton Part Number: RT10Z-W
