

Lumina RF 300W Plug-In Dimmer

lumina rf

APPLICATION

The DL3HL is a Lumina RF wireless plug-in dimming module that dims and brightens connected table and floor lamps, as well as switches devices on or off. Simply plug the device into any standard wall outlet, and the device can communicate back to a control hub using the wireless mesh network. Connect to a Leviton Omni or Lumina™ Gateway control system for scheduled automation and remote access of your plugged-in device.

FUNCTIONALITY

Using wireless mesh technology, the plug-in load control module acts as an interrupter to turn small devices on or off based upon schedules or manual control via apps and Touchscreens. It can also be controlled locally by pressing the Push button momentarily to toggle the state (On/Off) of the controlled device. Take control of vampire and phantom loads with Leviton plug-in load control modules.

THE LUMINA™ RF FAMILY

Leviton's powerful wireless Lumina™ RF family ensures energy savings in new construction and retrofit in small applications. Scalable from single location to franchise to enterprise, with company-wide holidays and schedules easily managed for all locations. Control lights, lamps, fans, shades, pumps, and Somfy window coverings.

Additional Leviton Lumina™ RF products include thermostats, heavy-duty load control modules, and a general purpose plug-in module to enable a complete wireless energy management system.

FEATURES AND BENEFITS

- Wireless remote control of plug-in lamps, appliances, and fans
- Enrolling new devices is simple, add a plug-in module at any time.
- Long range, high power radio.

AGENCY STANDARDS AND COMPLIANCE

UL, FCC, RoHS
