

AquaRise® True Union Ball Valves

AquaRise® True Union Ball Valves are available in sizes ranging from 1/2" to 4". True union connections allow for easy valve removal and replacement without having to cut the pipe, saving time and money.

These unique ball valves feature an ultra-compact double block design and full port bi-directional operation. For even more reliable performance in potable water applications, EPDM O-ring seals are used where a variety of treatment chemicals may be present.

Product Selection Chart

Size (inches)	Size (mm)	Product Code
1/2	15	359000
3/4	20	359001
1	25	359002
1-1/4	30	359003
1-1/2	40	359004
2	50	359005
2-1/2	65	359102
3	80	359103
4	100	359104

AquaRise True Union Ball Valves are part of the complete system of pipe, valves, and fittings, engineered and manufactured to strict quality, performance, and dimensional standards.

Features and Benefits:

- Certified to 232 psi @ 23°C (73°F)
- Rated to 72 psi @ 71°C (160°F)
- Permanent solvent weld joints
- IPS socket x socket
- Threaded seat stop carrier provides improved seal integrity under tough service conditions
- **EASYFIT** multifunction handle doubles as a tool for ball seat adjustment and for tightening union nuts with precision

Standards:

Certified to NSF 14,
NSF 61, ASTM F1970
