EZSoffitVentTM

EZSV14 Soffit Termination Discharge System:

HVI-Certified soffit termination system designed for ventilation fans up to 110 CFM, using 4" ductwork. Allows for complete ducting prior to soffit panel installation. Vent body snap-fits into a mounting bracket and is able to rotate 180 degrees to align with ducting, and incorporates a built-in air-tight back draft damper. Minimum overhang specification: 4/12 pitch, 12"soffit (10.5" fascia to building), and 2x6 fascia board.
