- U.3018L
- U.3019X

TUB MIXER BODY

- U.3021L
- U.3022X

Max Temp : 85°C/185°F

Recommended Working Pressure:
Min 1bar/15psi
Max 5bar/75psi

Ideal performance obtained with equal hot & cold pressures.

For installation with

- U6387
- U6386
- U6380
- U6381

Congratulations on the purchase of your Perrin & Rowe Bathroom Product. Correctly installed and with sensible care, this product will give you many years of trouble free service.

IMPORTANT INFORMATION

Before you proceed... We recommend you engage the services of a registered plumber to install this product.

For ease of possible future servicing, we also recommend the fitting of conveniently placed isolating valves.

In addition to the guide below it is essential that the written information overleaf is carefully read and understood.

Preparation Check Box for Installer

Flush the plumbing system before installing the bathroom product.

Once unpacked remove large & small base seals, rosette, hood & lever, securing nut, clamp plate, pop-up and top waste ready for installation.

Wall Unions

Fit two 3/4" NPT female fittings into the wall at 7 7/8" Centers. Fit a 3/4" NPT male shank (not supplied) into the fitting so that no more than 5/8" of thread is protruding from the wall. Apply thread sealing material to shank and screw union onto shank. Turn union to required position and slide rosette up to wall surface. A silicone seal can be applied between the wall rosette if required.

Hand Shower and Cradle

Screw cradle nut fully onto the mixer body, ensuring that the fiber washer is in position between the cradle and body. The outlet for the handshower can be positioned facing left or right. Screw tapered end of the handshower hose onto the handshower and screw the nut end onto the cradle. Place the handshower onto the cradle.

Extended Pillar Unions

Remove backnut and fiber washer from union. From top pass shank through hole in surface ensuring that the base seal remains position. Replace backnut and fibre washer onto shank and tighten by hand only so that unions can still rotate.

Floor Legs

See installation guide supplied with floor legs.

BEFORE USE

- Carefully check the installation for leaks.
- If further building work is to be carried out in the vicinity, cover the product with a plastic bag to avoid damaging the finish.
- Please ensure that the installation complies with local plumbing codes.

CARE & MAINTENANCE

Wipe down after use to avoid water spotting and mineral build up.

Occasional cleaning with warm soapy water, followed by a polish with a soft cloth is all that is required to keep the plated finish in good condition.

Do not use proprietary abrasive liquids, powders, or pads to clean the shower. Do not use any products with ammonia bleach or limescale remover. You will damage the plated finish and void your guarantee.

Floor Legs For Tub/Shower Mixer

Floor Legs - U.6388

Temp Range:
Min 1°C/34°F
Max 85°C/185°F

Recommended Working Pressure:
Min 1bar/15psi
Max 5bar/75psi

Ideal performance obtained with equal hot & cold pressures.

For ease of possible future servicing, we also recommend the fitting of conveniently placed isolating valves.

In addition to the guide below it is essential that the written information overleaf is carefully read and understood.

Preparation Check Box for Installer

- Flush the plumbing system before installing the Bathroom product. The hot supply should be on the left when viewed from the front of the fitting. Ensure the mounting surface is level.

1

2

Slide outer tube over the Supply Flex with the Access Slot aligned with stop valve screw.

Ensure the top nut remains accessible

Loosely fit the outer tube to mounting surface with 4 fixing screws.

Slide rosette over outer tube and place on top of floor leg flange.

Holding the nut on supply flex, thread on the union. Avoid twisting supply flex.

The mixer can now be fitted using the installation instructions supplied.

Fully secure assembly to mounting surface.

Lock unions in position with the grub screw in the inside of the outer tube using the hexagon key supplied.

BEFORE USE

- Carefully check the installation for leaks, internal leaks will be noticeable through the Access Slot.
- If further building work is to be carried out in the vicinity, cover the tap to avoid damaging the finish.
- Please ensure that the installation complies with local plumbing codes.
