Fax: 1-866-576-6200 or 1-772-620

Email: salesdept@pipetytes.com

ADD-A-HANGER

FUNCTION: To hang copper or cpvc tubing from threaded rod. Based on an industry average of \$8-\$12 (parts and labor) to install one threaded rod and hanger, Pipe-Tytes' Add-A-Hanger will save you up to 90% of the cost to hang an additional pipe.

HOW THEY WORK: The Add-A-Hanger twists on & off. Fine vertical adjustments can be made by turning the hanger around the rod like a nut. Pipes can snap in and out. Hangers should be spaced no more than 5 feet apart. Available for 1/2" 3/4" & 1" Tubing and installs on existing or new 3/8" threaded rod. Quantity 25 per bag.

WHY CHOOSE THIS ITEM TO RUN PIPE?

1. \$\$\$ savings.
2. Saves time & effort.
3. Simplest way.

BENEFITS:

Eliminates pipe rattle and electrolysis.
Tubing is secure and protected from sharp metal edges.

Note: Refer to local plumbing code before using this product.

Place hanger around rod as shown.

Then twist until vertical...

...and locked into place.

Once locked into position, just snap tubing into place.

Vertical adjustments may be made by rotating hanger up or down before pipe is installed.
Note: Hanger may appear loose on threaded rod until tubing is installed.

toilet **KART**

THE TOILET KART IS A TOOL THAT ASSISTS IN MOVING A TOILET.

How it works: The Toilet Kart straddles the toilet with its legs and 3 clamps attach to the underside of the toilet rim. Using the crank, the Toilet Kart can lift the toilet up and hold it stationary above the floor. Once you are ready to move the toilet, simply roll the toilet where you need it.

Dimensions: Height: 4 ft. Width: 23½ in. Depth: 20 in.
Weight: 27lbs. Max. Load: 100+ lbs.

Why use this product? Checkmark the features that are important to you.

- ☐ Fits most toilets.
- ☐ Easy to use; attaches quickly to toilet.
- ☐ Saves your back: Lifts the heavy toilet for you.
- ☐ Holds the toilet level.
- ☐ Good alignment with the closet bolts.
- ☐ Career longevity - eliminates back strain.
- ☐ Cleaner Repair Work - don't have to set dirty toilet on the floor.
- ☐ Speedy Installations — good for multiple installations.
- ☐ Fits through narrow doors.
- ☐ Won't drop the toilet.
- ☐ Tips back to roll over uneven ground.
- ☐ Wheels can quickly be moved to the inside of Kart for narrow spaces.
- ☐ Made in the USA.
- ☐ Accessory Tool also available: Wall mount toilet orientation tool for installations.

Insulators for Metal Studs

Insulates copper or polypipe tubing from sharp metal edges.

- Eliminates pipe rattle & electrolysis.
- Pipe-Tytes completely isolates the pipe from the metal stud.
- Fits 1/2" 3/4" & 1" copper tubing.
- Off-set hole makes for better pipe alignment.
- Made of tough, durable polyethylene. Withstands temps of 180° F.
- For use on all metal studs 18 gauge or lighter.

Installs in seconds for a neat professional job:

1. Punch hole in metal stud with the ET-5 Stud Punch.
2. Place PipeTyte grommet over the pipe and push into the hole. Will not fall out or break. Secures the pipe to the stud either before or after soldering. This feature enables the plumber to fit many pipes together and maintain accurate pipe position before soldering.
3. The patented off-center hole allows you to rotate the PipeTyte grommet in the hole to level or add pitch to the pipe. This enables the pipe to pass by stacks, or rotate back away from drywall screws or nails.

ET-5 Metal Stud Punch

Meets UL Standard 2043, "Fire Test for Heat and Visible Smoke Release for Discrete Products and Their Accessories Installed in Air-Handling Spaces." Please refer to www.pipetytes.com for more info.
