Hand-Held Inspection Cameras

Your world is filled with spaces and components that are just out of reach or eyesight. In many cases it takes more time to locate problems than it does to actually fix them. The RIDGID® line of hand-held visual inspection cameras eliminates the guess work and reduces the amount of time required to detect and diagnose the unreachable. Whether it's a cracked heat exchanger, a blown hydraulic line, a tricky installation, or a quality assurance parts inspection, RIDGID offers a visual inspection camera to suit your needs.

All RIDGID hand held inspection cameras come equipped with a camera and light source attached to the end of a flexible 3' (90 cm) cable. This cable can be bent and twisted into the most inaccessible areas. The camera sends live images back to a high visibility digital LCD display allowing for detailed visual inspections in hard to reach spaces.

NaviTrack Scout® Locator

The NaviTrack Scout locator is designed to solve the most demanding remote transmitter (sonde) locates using multi-directional locating technology.

Easier Locates

The NaviTrack Scout multi-directional antenna technology sees the entire signal all of the time. Simply maximize the signal strength and you have found the target. No nulls or false peaks to complicate the locate.

Accuracy

This locator verifies the locate position using a micro-mapping display to mark distinctive poles in front of and behind the target, insuring an accurate locate.

Automatic Depth

Depth is automatically calculated and displayed when over the target.
